Buspirone tablet

What is this medicine?

BUSPIRONE helps to relieve certain states of anxiety. It is chemically different from other medicines that treat anxiety and has very little effect on mental alertness. Buspirone does not produce dependency problems.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- if you are currently receiving other medications for the treatment of anxiety
- liver disease
- kidney disease
- an unusual or allergic reaction to buspirone, other medicines, foods, dves, or preservatives
