Nimodipine tablet

What is this medicine?

NIMODIPINE is a calcium-channel blocker. It affects the flow of calcium in and out of certain cells in your body and relaxes blood vessels.

Nimodipine is used to treat subarachnoid hemorrhage, a condition in which severe headaches and stiff neck are caused by bleeding into the space around the brain.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- heart problems, slow heart rate
- liver disease
- low blood pressure
- previous heart attack
- an unusual or allergic reaction to nimodipine, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Take nimodipine capsules by mouth. Swallow the capsules with a drink of water. Avoid taking nimodipine with grapefruit juice or grapefruit. Take your doses at regular intervals. Do not take your medicine more often than directed. Continue to take your medicine even if you feel better. Do
