Tadalafil tablet

What is this medicine?

TADALAFIL is used to treat erection problems in men.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- eye or vision problems, including a rare inherited eye disease called retinitis pigmentosa
- heart disease, angina, a history of heart attack, irregular heart beats, or other heart problems
- high or low blood pressure
- kidney or liver disease
- stroke
- an unusual or allergic reaction to tadalafil, other medicines, foods, dyes, or preservatives
