Ibuprofen tablet

What is this medicine?

IBUPROFEN is a non-steroidal anti-inflammatory drug (NSAID). The medicine may be used for dental pain, fever, headaches or migraines, osteoarthritis, rheumatoid arthritis or painful monthly periods. It can also relieve minor aches and pains caused by a cold, flu, or sore throat.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- asthma
- cigarette smoker
- drink more than 3 alcohol containing drinks a day
- heart disease or circulation problems such as heart failure or leg edema (fluid retention)
- high blood pressure
