Ledipasvir and Sofosbuvir tablet

What is ledipasvir and sofosbuvir?

Ledipasvir and sofosbuvir are antiviral medications that prevent hepatitis C virus (HCV) from multiplying in your body.

Ledipasvir and sofosbuvir is a combination medicine used to treat hepatitis C genotypes 1, 4, 5, or 6. This medicine is for use in adults and children who are at least 12 years old or who weigh at least 77 pounds (35 kilograms).

Ledipasvir and sofosbuvir is sometimes given in combination with another medicine called ribavirin.

Ledipasvir and sofosbuvir may also be used for purposes not listed in this medication guide.

What is the most important information I should know about ledipasvir and sofosbuvir?

You should not use ledipasvir and sofosbuvir if you are also taking sofosbuvir tablets (Sovaldi).

If you have ever had hepatitis B, ledipasvir and sofosbuvir can cause this condition to come back or get worse. You will need frequent blood tests to check your liver function.

What should I discuss with my healthcare provider before taking ledipasvir and sofosbuvir?

You should not use ledipasvir and sofosbuvir if you are allergic to it, or if you are also taking sofosbuvir tablets (Sovaldi).

To make sure ledipasvir and sofosbuvir is safe for you, tell your doctor if you have:
