

I discovered a workaround for downloading data as an xlsx file by utilizing stackoverflow's solution and modifying it slightly. Below is my modified code that may aid you in achieving similar results. ```javascript const blob = await res blob(): const href = await URL_createObjectURL(blob); // Create a new link element to initiate the download ink.clck(); // Release the object to prevent memory leak document.body.removeChild(link); ``` Alternatively, you can use the follownload ink.clck(); // Release the object to prevent memory leak document.body.removeChild(link); '`` Alternatively, you can use the follownload the file hame + "ison"; // Release the object to prevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Create a file in browser const fileName + "ison"; // Release the object to prevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Release the object oprevent memory leak document.body.removeChild(link); URL_revokeObjectURL(blob); // Rel
