Next to a video, tap More Stop sharing Stop sharing Stop sharing link, tap Get link to share. Emergency recording is intended for personal use in emergency situations to keep you safe. Google will automatically disable an active shared link if it's being shared excessively. How auto backup works Emergency recordings are automatically uploaded to the cloud to help prevent data loss if you're on limited data access. Uploaded emergency recordings can be managed any time with an internet connection. To manage your videos: On your phone, open the Safety app . At the top left, tap Your info Your videos. Next to a video, tap More Share or Delete. Tip: If you delete a file, it's permanently deleted from your Google Account and this action can't be undone. Accidental calls If you place a call to emergency services by mistake, do not hang up. Tell the emergency 112 in Europe. If Android Emergency Location Service (ELS) works in your country or region and on your mobile network, and you haven't turned ELS off, your mobile carrier might still send the device's location during an emergency call or text. On your ELS may use Google Location Services and other info to determine the most accurate location for your phone during an emergency call. ELS may also send extra info, like the language your device is set up with. To help them locate and assist you, your phone makes this data available to authorized emergency response services. Emergency response services receive this data directly from your phone, not through Google. After you complete a call or text during which ELS was active, your phone sends usage, analytics, and diagnostics data to Google via Goo location. When you send your location with ELS, the process is different from when you share your location with Google Maps. percentage. You must give the Personal Safety app permission to access your location. To use emergency sharing, you'll need: At least one emergency sharing on your phone, open the Safety app permission to access your location. To use emergency sharing on your phone, open the Safety app permission to access your location. location with. You can also add an optional message. Tap Share You can tap the notification banner to find the details of your "Emergency sharing." Tip: If location sharing On your phone, open the Safety app. At the top left, tap Emergency sharing Stop Stop sharing. You can add a note to explain why you've ended the emergency sharing will automatically end after 24 hours. Managed Emergency Sharing settings On your device, open the Safety & emergency sharing. Scroll to the bottom of the screen and tap Settings. Select the information that you want to share with your emergency contacts during an emergency share. Turn Multi-device location sharing on or off. Tip: When Multi-device location sharing is turned on for a device, we will use the device, we will use the device can no longer share its location. Schedule a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can schedule a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can schedule a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can schedule a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can use a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can use a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can use a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can use a Safety Check If you want your phone to check on you and let your emergency contacts know if anything is wrong, you can use a Safety Check If you want your phone to check on you can use a Safety Check If you want your phone to check on you can use a Safety Check If you want your phone to check you can use a Safety Check If you want phone, open the Safety app . Tap Safety Check. Select your Reason and Duration. You can set the check at any duration for up to 24 hours. Tap Next. Select your contacts, they're notified when a Safety Check is scheduled and has ended. Important: An ongoing Safety Check can't be extended beyond 24 hours past the original start time. You need to authenticate before the time of your Safety Check both prior to and at the time of check-in. If time is added, the Safety Check updates to continue until the new extended time you selected. You can add time: In Personal Safety app. When the Safety Check add time within the Personal Safety app. On your phone or watch, open Safety. Tap Safety Check. At the check-in screen, under the remaining time, tap Add time. From the Safety notification: On the Personal Safety notification. On the Personal Safety notification. On the Personal Safety notification on the Safety notification. On the Personal Safety notification on the Personal Safety notification on the Personal Safety notification. On the Personal Safety notification safe, the emergency share will be canceled. You can stop the Safety Check at any time through the notification, choose one of the options: I'm OK Start sharing now Call 911 If your phone is locked, you might need to unlock it. If your phone turns off or loses signal, the Safety Check will remain active and will start an emergency contacts are notified When a safety check starts, if you turn notifications on for your emergency contacts, they get a text with your name, the duration of your safety check, it is a few safety check starts, if you turn notifications on for your emergency contacts, they get a text with your name, the duration of your safety check, it is a few safety check starts, if you turn notifications on for your emergency contacts are notified. and a reason, if you provided one. Later, if you start an emergency share manually or can't mark yourself as OK when your phone checks in, Google Maps. Emergency sharing and safety checks stop when you stop it or mark yourself safe. When they stop, Google sends another text to your contacts to let them know it ended. Share emergency info with emergency services. Open your Personal Safety app to send info to emergency services. Open your personal Safety app to send info to emergency services. Open your Personal Safety app to send info to emergency info with emergency services. Safety app about public emergencies or local crises, like natural disasters. Crisis alert notifications include a link to the Safety app's homepage where you can find extra information about the event. Crisis alerts are available in all countries and regions and all languages. If your phone is set to a different language other than the local language, the alert may show up in the official language of your current location instead of your set language. On your phone, open the Safety app notifies you. Google posts crisis alerts based on various factors, like internet connectivity in the affected area, the availability of official content from governments and other authoritative organizations, and the impact on the ground. Find out about earthquakes in your area Your phone can detect earthquakes in your area. To learn more about nearby earthquakes, open Google search and search for "earthquake in [your city or region]." To stop your phone from contributing toearthquakes of magnitude 4.5 and above using your approximate location. Coarse locations from Android devices are used to determine which devices will receive an earthquake alert. This information does not and is not used to identify or locate a specific user. Earthquake alerts can be turned off at any time in Safety & emergency Earthquake alerts. Earthquake alerts are detected by ShakeAlert and by Android. Important: Earthquake alerts arent supported in all areas. Not all earthquakes can be detected. Magnitude and shaking intensity estimates may have errors. You may receive an alert before, during, or after shaking begins. These earthquake alerts are based on data from ShakeAlert, and are currently active in the following US states: California, Oregon, and Washington. These earthquake alerts are based on the Android Earthquake Alerts System. Where event impacts cross state borders: Regardless of the event, you'll receive alerts from Android Earthquake Alerts System is active Afghanistan Albania Algeria Anguilla Antigua and Barbuda Argentina Armenia Aruba Australia Austria Azerbaijan Barbados Bangladesh Belize Bhutan Bolivia Bosnia & Herzegovina Brazil Bulgaria Chile Colombia Croatia Cuba Cyprus Czechia (Czech Republic) Djibouti Dominican Republic Ecuador Egypt El Salvador Eritrea Ethiopia Falkland Islands France Georgia Germany Greece Grenada Guadeloupe Haiti Honduras Hungary Iceland India Iran Iraq Israel Jamaica Jordan Kazakhstan Kosovo Kyrgyzstan Laos Lebanon Malaysia Moldova Mongolia Montenegro Myanmar Nepal New Zealand Nicaragua North Macedonia Oman Pakistan Palestine Papua New Guinea Peru Philippines Portugal Romania Saint Barthelemy Saint Martin San Marino Saudi Arabia Serbia Sint Maarten Slovakia Slovenia Solomon Islands Somalia Spain Switzerland Tajikistan Tanzania Thailand Timor-Leste Trinidad and Tobago Tunisia Turkey Turkmenistan Ukraine United Arab Emirates United States Uzbekistan Vanuatu Venezuela Earthquake alerts are on by default. You might not get alerts for all earthquakes in your area, and you will only receive alerts in supported countries. Occasionally, you may get an alert but not feel an earthquake in your location. Wireless Emergency Alerts & Emergency Alerts System Wireless Emergency Alerts and Emergency Alert System alerts always show up on top of any other screen. For example, on Android, if a state issues a severe storm alert as Wireless Emergency Alerts or Emergency Alerts System; always on top Earthquake Alerts: Next App notifications: Last Turn earthquake alerts on or off Important: To get alerts, you must have Wi-Fi or data turned on. Open your phone's Settings app. Tap Safety & emergency, tap Location Advanced Earthquake alerts. Turn Earthquake alerts on or off. Changes are coming to this article This article and disclaimer requirements for health and medical apps. Were also consolidating health-related policies under the Health Content and Services article, visit this page. We don't allow apps that expose users to harmful health content and services. If your app contains or promotes health content and services, you must ensure your app is compliant with any applicable laws and regulations. If your app accesses health data and is either a health app or offers health-related features, it must comply with existing Google Play Developer Policies, including Privacy, Deception and Abuse and Sensitive Events, in addition to the below requirements: Console Declaration: Go to the App content page (Policy > App content) in Play Console, and a privacy policy link or text within the app itself. Please make sure your privacy policy is available on an active, publicly accessible and non-geofenced URL (no PDFs) and is non-editable (as per the Data safety section). Your apps privacy policy must, together with any in-app disclosures, comprehensively disclose the access, collection, use, and sharing of personal or sensitive user data, not limited by the data disclosed in the Data safety section above. For any functionality or data regulated by dangerous or runtime permissions, the app must fulfill all applicable prominent disclosure and consent requirements. Permissions, the app must fulfill all applicable prominent disclosure and consent requirements. permissions must be removed. For the list of permissions that are considered in scope of health app categories and additional information. If your app is not primarily a health app categories and additional information. If your app is not primarily a health app, but has health app categories and additional information. If your app is not primarily a health app categories and additional information. connection between the apps core functionality and the collection of health related data (for example, insurance providers, games apps that collect a users activity data as a way to advance game play etc.). The apps privacy policy must reflect this limited use. Additional requirements: If your health app qualifies for one of the following designations you must comply with relevant requirements in addition to selecting the appropriate category in Play Console: Government or a recognized healthcare organization to develop and distribute an app in affiliation with them, you must submit proof of eligibility via the Advance Notice Form. Contact Tracing/Health Status apps: If your app is a contact tracing and/or health status app, please select Disease Prevention and Public Health in Play Console, and provide the required information via the advance notice form above. Human Subjects Research Apps: Apps conducting health-related human subjects research must follow all rules and regulations; including but not limited to, obtaining informed consent from participants or, in the case of minors, their parent or guardian. Health Research apps should also secure approval from an Institutional Review Board (IRB) and/or equivalent independent ethics committee unless otherwise exempt. Proof of such approval must be provided upon request. Medical Device or SaMD Apps: Apps that are considered medical devices or SaMDs must obtain and retain a clearance letter or other approval documentation that has been provided by a regulatory authority or body responsible for the governance and compliance of the health app. Proof of such clearance or approval must be provided upon request. We do not allow apps that facilitate the sale or purchase of prescription drugs without a prescription. Google Play doesn't allow apps that promote or sell unapproved substances, irrespective of any claims of legality. Examples of common violations All items on this non-exhaustive list of prohibited pharmaceuticals and supplements. Products that contain ephedra. Products containing human chorionic gonadotropin (hCG) in relation to weight loss or weight control, or when promoted in conjunction with anabolic steroids. Herbal and dietary supplements with active pharmaceutical or dangerous ingredients. False or misleading health claims, including claims implying that a product is as effective as prescription drugs or controlled substances. Non-government approved products that are marketed in a way that implies that they're safe or effective for use in preventing, curing, or treating a particular disease or ailment. Products with names that are confusingly similar to an unapproved pharmaceutical or supplement or controlled substance. For additional information on the unapproved or misleading pharmaceuticals and supplements that we monitor, please visit www.legitscript.com. We dont allow apps containing misleading health claims that contradict existing medical consensus, or can cause harm to users. Examples of common violations Misleading claims about vaccines, such as that vaccines can alter ones DNA. Advocacy of harmful, unapproved treatments. Advocacy of other harmful health practices, such as conversion therapy. We dont allow apps that feature medical or health-related functionalities that are misleading or potentially harmful. For example, we do not allow apps that claim to have oximetry functionality that is solely app-based. Oximeter apps must be supported by external hardware, we arable, or dedicated smartphone sensors designed to support oximetry functionality. These supported apps must also contain disclaimers in the metadata stating that they are not intended for medical use, are only designed for general fitness and wellness purposes, are not a medical device, and must properly disclose the compatible hardware model.
