

macOS / Earlier Operating Systems Hello, I have a Macbook a1181 and my appstore does not work. I know this is a very old version of a macbook, but I want to use it? II have personalized it with me being the administrator, but my applicationes still dont work and I cant use it. Only Mozilla runs normally. If this community can give me any advise I will be verry happy![Re-Titled by Moderator] Posted on Mar 2, 2024 11:48 AM Reply Page content loaded Mar 4, 2024 6:21 AM in response to mihaela298 MacTracker shows a number of old MacBooks that have the model number A1181. The MacBook (13inch) introduced in May 2006 can't run anything later than Snow Leopard. The Late 2008, Mid 2007, Late 2008, and Late 2008, an out at the same time, but are different in terms of the maximum version of Mac OS X they can run. The latter had model number A1278, so we know we're not dealing with one of them. Mar 5, 2024 7:26 AM in response to mihaela298 The "2 GHz Intel Core Duo" pegs it as a MacBook (13-inch) introduced in May 2006 that originally came with Mac OS X 10.4.6 ("Tiger"), has a 32-bit CPU, and can't un anything higher than Mac OS X 10.6.8 ("Snow Leopard"). All of the other possibilities for A1181 (from Late 2006 through Mid 2009) have 64-bit Core 2 Duo CPUs. It replaced the iBook G4 (Mid 2005). Apple moved from PowerPC-based Macs to Intel-baed ones starting in 2006 and this was the first Intel-based model in the renamed entry-level (no "Pro") notebook line. Apple discontinued it in November 2006 more than 17 years ago. If you like collecting old computers or if you have a source of old Mac OS X games that will run on it you could keep it around. But as a platform for running modern applications, it's obsolete, and has been that way for a long time. Mar 9, 2024 9:47 AM in response to mihaela298 Thank you Servant of cats ! I have ordered one dvd with the OS of Snow leopard and I think I will use your update... Ill hope that after that it will work and everything will be ok:)So Ill keep trying with this Mac and Ill post everything that happens here so I hope to have further useful information here... Thank you all that you write in this chat and for your advices :) Mar 26, 2024 12:25 PM in response to mihaela298 Hello again!I hope that you will see this message cause its important...So here what it is... I bought and put inside the macbook one hard drive with Snow leopard and now everything else works except the appstore again and safary and I also cant instal any other browser so its difficult even to read my mail...So my question is now should I buy also the DVD or CD with the OS of Snow Leopard or should I seek for new solutions? Please answer if you can! Mar 26, 2024 3:12 PM in response to mihaela298 The problem is Snow Leopard is ot up to todays Internet demands, especially Safari.Try iCab 5.8.6 (2018/09/28), it's plain http so you should be able to get it. older TenFour Fox for G3... App Store does not work on my MacBook Most of us download apps for our Macs from the App Store, so it can be frustrating when it suddenly stops working after an update or for no apparent reason. If the App Store on your Mac, dont worry! Ive listed tried-and-tested solutions to fix the issue and explained the possible reasons behind it. If youre having trouble with the App Store on your Mac, here are some common reasons: FaceTime Like a Pro: Get our exclusive Ultimate FaceTime Guide absolutely FREE when you sign up for our newsletter below. Internet connection is slow or unreliable, it may not work properly. Apple System Status: Apples services, including the App Store, occasionally experience outages. Check the Apple System Status page to see if the App Store is down. Software updates: Running an outdated version of macOS can cause compatibility issues with the App Store. Date and time settings: Incorrect date and time settings can interfere with the App Stores functionality. Storage issues: If your Mac lacks sufficient storage space, you may not be able to download apps. App Store glitches: Issues like an incorrect payment method, a corrupted cache, or enabled Content Restrictions may prevent app downloads. Now that you know the possible causes, lets go through troubleshooting steps to fix the issue and resume downloading apps. Whenever you encounter an issue with an online service, check if you are connected to the internet or have a good connection. Restart your Wi-Fi and see if you can use the App Store now. If the issue is not with your internet connection, its time to try the next method. If your Wi-Fi isnt working, you might want to go through our explainer to troubleshoot the issue. If the date and time on your Mac are incorrect, you wont be able to access any internet services, let alone the App Store. So, make sure you have set the date and time of your Mac properly. Heres how to do it: Click theApple iconSystem Settings (or System Preferences) Date & Time. Now, click the lock button below to unlock thepreference pane. Enter your password. You will see two ways to change the date and time on Mac:Automatic: Tick theSet date and time automatically and set the correct network time server. Manual: Uncheck theSet date and time automatically check box and set the correct network time server. want to go back to the default time settings, go to Date & Time and click Revert. Other than that, if you want to change the Time zone on your Mac, you have to: Go to Date & Time zone on your Mac, you have to: Go to Date & Time zone on your Mac, you have to: He timezone. There are two options to set the timezone in Mac: Automatic: Check the box next to Set time zone automatically using the current location. Manual: Uncheck Set time zone automatically using the current location and select the timezone according to your region. After settings. If changing the date doesnt help, try checking Apples servers. Since you cannot use the App Store, you better close it. But instead of closing normally, lets force close it. For that, you can either use the shortcutCommand + Q. Or: Click App Store next to the Apple icon at the top left. Select Quit App Store icon from the dock and clickQuit. If you have restricted the Mac App Store before, you will face issues while using the app. So to solve this issue, we need to reverse it. Go to System Settings (or System Preferences) Screen Time. Click Content and Privacy. Select Apps. Turn on the iTunes Store. Congratulations! You have unrestricted the App Store on Mac. But if you are still unable to access it, proceed to the next method. The Mac App Store may not work while using a VPN. Turn off the VPN and check if you can access the store now. Since a VPN service changes the region, disable the VPN and change the App Store region on the Mac. Now, check if the App Store works. We at iGeeksBlog use a magical spell calledRestart when theres anything wrong with our Mac or iPhone! A simple restart might help fix the App Store issue. Your Mac will clear all the cache files stored in the RAM when restarting. While cache files help load apps faster, when they accumulate over time, they affect the proper working of some apps. Its good to restart your Mac once in a while to avoid similar issues in the future. out and signing in to your Apple ID. When you do this, Apple will resync all your data and might solve the issue. To sign out from your Apple ID on Mac: Click the Apple ID on Mac: Click the Apple ID on Mac: Click the Apple ID and Sign out. Next, select what information you want to copy to your device from iCloud. After completing the process, you will be signed out from your Apple ID on your Mac. To sign in, follow the same path and instead of clicking Sign out at the end, click Sign in. Safe mode is a secure version of MacOS that blocks most unnecessary background activities and only allows necessary services to run the OS. If any applications block the proper functioning of the Mac App Store, try opening the app in safe mode and see if it works. To run Intel-powered Macs in safe mode. To Safe boot your M1-powered Macs and newer ones: Press and hold the power button until you see the startup option. Select your startup disk. Press and hold the Shift key until you see the login screen. Now, log in. Try running the Mac App Store in safe mode and see if you face any issues. Are there any updates available for your Mac? If yes, its better to update your Mac since Apple tries to fix common issues reported by the community with each update. If the Mac App Store is not working properly because of any macOS issues, an update may fix them. To check updates on Mac, you need to: Open System Settings (or System Preferences). Click System update. If there is any update available, you will see the option to update. Click it. Still not fixed? Lets create another admin user on your Mac, it acts the same as using a Mac for the first time since you will only see the pre-installed services and apps. No apps or files on the previous user profile will influence the activities of this new user. Lets check the steps for creating a new admin user on Mac: Click the Apple icon at the top right. Select System Settings (or Then, click Confirm. After creating the new user ID, login and see if the Mac App Store is working. If it is, it means that some files or apps on your primary user ID are blocking the app from the App Store and see if that helps. Wrapping up Since most people download the required apps for their Macs from the App Store, it can be annoying when they wont work. I hope this article helped resolve the issue. By the way, do you download apps outside the Mac App Store? Let me know in the comments below. While you are here, check out our other guides Stores / Using App Store bought my first mac last week (M4 Air), since i set it up last week, i cant download any apps through
appstore as during apple account review it asks abt my adress n details , when i fill it up it showas this error message. what should i do to download apps through app store? pls help[Re-Titled by Moderator] MacBook Air 13, macOS 15.3 Posted on Mar 29, 2025 6:13 AM Reply Page content loaded Mar 29, 2025 6:21 AM in response to jash132 It looks like the issue is with how the postal code is being entered. The App Store form may not accept certain formats or might require hyphens or specific spacing. Try entering your postal code like this:Postal Code: XXXXX-XXXX This thread has been closed by the system or the community team. You may vote for any posts you find helpful, or search the Community for additional answers. Why is my App Store Is anyone having a problem that their appstore on their mac (mine is a mac air 2020) isn't loading like when I click of it is just a white backgruond screen and on the left side is gray for the gray sidebar. I tried force quitting, restarting and shuting down and tunring on my copmuter and it doesnt work. Anyone have answers? App store not opening on mac air 2020 The App Store is an important place. You can find all kinds of apps there. Additionally, it services app updates and performs some other functions. Its fairly noticeable when it ceases to work. Luckily, this is a pretty straightforward issue with some simple troubleshooting. Lets find out why the App Store isnt loading on a Mac?Joe Hindy / Android AuthorityThere are a few different reasons why the App Store isnt loading. They include:Your internet connection is down, or your Mac isnt connected to the internet. The App Store service is down. The App Store started incorrectly and needs to be restarted. Your Macs software update messed things up a little bit. Any one of those things can keep you from getting into the Mac App Store. Luckily, the troubleshooting for all of these problems is fairly simple, and well go down the list and show you each one. This should only take about five or so minutes. The most common cause of the App Store not loading is a missing internet connected to the internet. Below, we have some troubleshooting steps that may help fix the problem, but remember that troubleshooting network issues can be tedious and annoying. Are you connected to your router? Joe Hindy / Android Authority The first problem to solve is to make sure youre connected, and you can skip this section. However, we do recommend clicking on that white icon to make sure youre connected to the correct network. Otherwise, proceed to the steps below. Click the grayed-out Wi-Fi is turned on. Those with Ethernet connections should unplug and plug in the cable to ensure the connection is stable. Those using Wi-Fi who have problems connecting can check out Apples tutorial on connecting to Wi-Fi.Those using Ethernet should make sure the cable isnt damaged, is properly connected to the machine, and ensure their network settings are correct. Apple has some additional steps you can take here. You can also click on the Wi-Fi icon and then click Network Preferences to get a better look at your network configuration. It may help troubleshoot your issue. In any case, once you get your white Wi-Fi icon back, youre connected once again. Try opening the App Store to see if this worked. If not, keep going. Is your internet malfunctioning? Joe Hindy / Android AuthoritySometimes, your internet malfunction have been going. Is your internet malfunction have been going. Is your internet malfunction have been going. Is your internet malfunction have been going. If not, keep going. Is your internet malfunction have been going. If not, keep going. Is your internet malfunction have been going. If not, keep going. If n it. First, make sure youre connected to your router, as indicated by the white Wi-Fi icon in the top right corner. Next, try using a different app. For example, try going to a random website with Safari, sending an iMessage, or using the internet in some other way. If your Mac is struggling with or failing any of the above tasks, that means your internet connection is spotty or slow. This can cause the App Store to not load. Try rebooting, retry the earlier tests. If your internet is still sluggish or not working, its time to call your ISP and find out if there is an outage in your area. If so, you wont be able to do anything until the ISP fixes the problem. This may require a tech to visit your home in some cases. Once your internet is working properly again, try opening the App Store. If connections are the problem, the two tutorials above should either fix it or at least set you on the right track. How to check if the App Store is downJoe Hindy / Android AuthorityThe App Store is a service and, as such, can go down like any other service on the internet. Its not common, but its very easy to check for. Click this link to go to Apples System Status page. The very first entrant should be the App Store is a service and, as such, can go down like any other service on the internet. Its not common, but its very easy to check for. Click this link to go to Apple System Status page. The very first entrant should be the App Store is a service and, as such, can go down like any other service and the internet. because of a partial or complete outage. Check back periodically until the green circle reappears, then try using the App Store again. Thats it. Its a pretty simple problem to figure out and solve. How to check and see if you need a software update. When macOS and see if you need a software update. updates, it includes updates to the App Store until you download the latest one via the software update. This is also easy to check for. Click the Apple Logo in the top right corner. After that, click About This Mac.In the next window, click on Software Update. A box will pop up and check for an update. If you need one, the update will start downloading. Once done, repeat the prompts to install the update. Your Mac will reboot, so make sure to save any work. Once done, try opening the App Store again. If it doesn't work, we have a couple more things to try. Other potential causesJoe Hindy / Android AuthoritySometimes the Mac App Store is just having a bad day. You can try restarting the app and seeing if that works. Set your date and time Make sure your clock and date settings are right by clicking the Apple Logo, going to System Preferences, and Date & Time. If its not already, tick the box that says Set date and time automatically. Reboot and try the App Store to cease loading. If that works, try using a server closer to home on your VPN to prevent it from happening again. Force quit the app and try again Click Control+Option+Esc to open the Force Quit Applications box. Force close the App Store if its there and try opening it again. Reinstall macOS without wiping data This can help get rid of a lot of backend problems that are otherwise difficult to fix. We have a tutorial on how to do this here. This is an extreme solution, though, so we recommend it only as a last resort.Restart your Mac Sometimes, you just have to turn it off and back on again to fix issues. If, for some reason, any of the above tutorials or suggestions dont work, your last choice is to contact Apple support and ask them directly. Up next: Apple MacBook Pro buying guide: Which one should you get? FAQIs it possible to clear the App Store cache to get it working again?Yes. However, we were unable to verify the process on how to do it. On older Macs, you can go to Library, then Caches, and delete the App Store is the safest place to download new apps for your Mac. If your Mac cannot connect to the App Store, dont start downloading apps from unknown sources, follow these tips if your Mac cannot connect to the App Store and restart your Mac.Open the App Store and go to Store > Sign Out.In System Preferences, set your Date & Time automatically.Weve explained these tips (and more) in full detail below.Why Does My Mac Say Cannot Connect to App Store? There are lots of reasons your Mac might not connect to the App Store. Perhaps theres a problem with your internet connection, Apples servers, or the operating system on your Mac.Its very common to experience problems with the App Store after updating macOS. Other times, it might stop working for no apparent reason. Your Mac might not connect to the App Store after updating macOS. through the steps below to fix your Mac when a blank screen says Cannot Connect to App Store. Be sure to test the App Store again after each step; weve listed them in order of most to least likely to help. And of course, before you get started with any troubleshooting, make a new backup of your Mac. That way your data is safe if anything goes wrong. Step 1. Check the Internet Connection on Your MacOpen your browser of choice and load a new webpage. If it doesn't work, or if the browser is unusually slow, there might be a problem with your Wi-F router.Connect to a different Wi-Fi network.Disable your VPN, if you use one.Open the Network System
Preferences and change your DNS.Contact your internet service provider for more assistance.Step 2. Check Apples Systems go down unexpectedly. Other times, Apple temporarily takes them offline for maintenance. Visit Apples System Status website for the latest information directly from Apple. Check the Mac App Store is operating normally. Apple adds notices or changes the color and shape of different lights to let you know when particular services arent working. Step 3. Quit the App Store and Restart Your MacThis is a basicbut effective roubleshooting step you should use whenever you experience problems with your Mac. Quit your active app by press Cmd + Q or select the app name, then Quit [App] from the menu bar.Quit the App Store before restarting your Mac.If the App Store doesnt close, press Cmd + Option + Esc and Force Quit it.After closing the App Store, go to > Shut Down and power off your Mac. Wait at least 30 seconds before pressing the power button to restart it again.Step 4. Sign Out and Sign in againFor many users, the blank screen says their Mac cannot connect to the App Store whenever they try to view Apple ID information. This hints to problems with your Apple ID account, the easiest solution for which is to sign out and sign in again. Open the App Store and select Store > Sign Out from the menu bar. Follow the instructions above to quit the App Store. When you re-open the App Store again, go to Store > Sign In and enter your Apple ID details to sign in again. Sign in again using your Apple ID email address and password. If that doesnt work, try signing out and signing in again from System Preferences > Apple ID > Overview. Step 5. Update Your Mac to the Latest macOS ReleaseA problem with the operating system on your Mac might be the reason a blank screen says you cannot connect to the App Store. This happens occasionally when macOS gets a software bug. Usually, Apple releases a patch update you can install to fix bugs like this. You just need to ensure youre running the latest version of macOS. Go to > About This Mac > Software Update to check for new macOS updates. Download and install any that are available. Beta users should revert to a public release of macOS. Check the box to automatically keep your Mac and Apples servers can cause communication problems with the App Store. This is easy to fix by setting your date and time automatically. On your Mac, go to System Preferences > Date & Time. Click the padlock and enter your administrators password to unlock changes. Then click the padlock and enter your administrators password to unlock changes. time to see if it fixes the App Store again, then reset your date and time. Step 7. Clear Your App Store ereferences From the LibraryYour Mac saves data about how you use the App Store as small files in the Library. It uses these files to provide a smoother experience for you, but sometimes they can get in the way with your Mac connecting to the App Store recreates new ones when you use it again. Open Finder to find and delete the cache files in case they are corrupt. The App Store recreates new ones when you use it again. Open Finder to find and delete the cache files in case they are corrupt. The App Store recreates new ones when you use it again. Open Finder to find and delete the cache files in case they are corrupt. Go.Finder will open the Caches folder when you click Go.Look for each of the following files and move any you find to the Trash:com.apple.appstoreagentstoreaccountstoreassetsstoredownloadstoreinappNow, go to ~/Library/Containers/ and delete these files if you find them:com.apple.storeagent.plistcom.apple.commerce.plistcom.apple.appstore.plistStep 8. Allow Incoming Connections From Your FirewallThe built-in firewall on your Mac protects it from potential malware threats. By default, your firewall is set to allow connections from the App Store. However, you should check the settings if youre experiencing problems.Go to System Preferences > Security & Privacy > Firewall. Click the padlock and enter your administrators password to make changes, then go to Firewall isnt blocking the App Store. You should also temporarily disable third-party security software, such as Norton AntiVirus. If that lets your Mac get past the blank screen and connect to the App Store, contact the developer for help adjusting your settings. Step 9. Reset the Firewall Cache on Your MacEven if you set the firewall to allow incoming connections, an issue with the cache might be why your Mac cannot connect to the App Store. You can reset the cache by deleting it in Finder and letting the firewall create a new one. Open Finder and select Go > Go to Folder from the menu bar. Type the file path above to access your firewall cache. Find and delete cricache. db or ocspcache.db. You may need to enter your administrators password to do so. Restart your Mac afterward and try connecting to the App Store again. If the App Store again. If the App Store says Unexpected error occurred while signing in: UNTRUSTED_CERT_FILE it means therea a problem with the keychain on your Mac. Many users fixed this problem by deleting VeriSign certificates from Keychain.Open Keychain Access from the Utilities folder in your Applications or using Spotlight. Search for verisign. Select all the results by holding Shift, then press Delete and enter your administrators password to delete them.Confirm you want to delete VeriSign certificates in the pop-up alert.What If Your Mac Still Cant Connect to the App StoreIf you followed all the steps above but still cannot connect to the Apple directly for one-to-one support. They should be able to narrow down the cause of your issue. Arrange to speak with Apple Store, over the phone, or using a webchat. And let us know what they suggest in the comments!Dan writes tutorials and troubleshooting guides to help people make the most of their technology. Before becoming a writer, he earned a BSc in Sound Technology, supervised repairs at an Apple Store, and even taught English in China., the free encyclopedia that anyone can edit.109,638 active editors 7,015,555 articles in EnglishPainting of a princess, most likely Pari Khan KhanumPari Khan Khanum (15481578) was a Safavid princess, the daughter of the second Safavid shah, TahmaspI, and of his Circassian consort, Sultan-Agha Khanum. Pari Khan played a central role in the succession crisis after her father's death in 1576. She thwarted the plans of her brother Haydar Mirza and enthroned her favoured brother, Ismail Mirza, as IsmailII. Instead of gratitude, she received restrictions and house arrest, and may have been behind the scenes, but his wife, Khayr al-Nisa Begum, emerged as a rival and procured her killing. Regarded as the most powerful woman in Safavid history, Pari Khan was able to dominate the ineffective Safavid court in a society that imposed harsh restrictions on high-class women. Praised by her contemporaries for her intelligence, in later chronicles she was portrayed as a villain who murdered two brothers and tried to usurp the throne. As of the start of 1598, the Gregorian calendar was 10 days ahead of the Julian calendar, which remained in localized use until 1923. Calendar year January 8 In Berlin, Joachim Frederich of the House of Hohenzollern becomes the new Elector of Brandenburg. January 17 The Tsar of the Russian Empire, Feodor I, dies of a sudden illness at the age of 40, leaving no children and bringing an end to the Rurik dynasty. His widow, Irina Godunova, takes action to secure the throne but her rule lasts for only nine days. January 26 After receiving no support from the Russia, and abdicates in favor of her older brother, Boris Godunov. January 29 In what is now South Korea, a force of 50,000 troops of the Korean kingdom of Joseon and Chinese Ming dynasty troops begins the siege of Ulsan, a Japanese-controlled castle located in the southwest port of Ulsan on the Sea of Japan. January 30 In Italy Cesare d'Este moves the capital of the Duchy of Modena, after the Duchy of Ferrara is declared by Pope Clement VIII to be at an end. February 21 Boris Godunov is elected as the Tsar of Russia by unanimous vote of the parliament of nobles, the Zemsky Sobor. March 19 Count Adolf von Schwarzenberg of Austria captures the Turkish forces had taken it over. [1]March 20 The Duchy of Brittany in France is conquered by King Henry IV, who forces the surrender of Philippe Louis de Lorraine-Mercur, Duke of Brittany. Merceur is then exiled to Hungary.March 23 The abdication of Sigismund's cousin, Andrew Bthory, is then elected as the new Prince.April 13 Edict of Nantes (promulgated April 30): Henry IV of France grants French Huguenots equal rights with Catholics; this is considered the French Wars of Religion.[2]April 30 In Mexico, on the day of the Feast of the Ascension, Juan de Oate, dispatched by the Viceroy of New Spain to expand the Spanish colony's territory. assembles his group on the south side of the Rio Grande and formally claims all territory north of the river (near what is now the U.S. city of El Paso, Texas) as a colony of the Spain announces and Spain. May 6 King Philip II of Spain announces that his eldest daughter, Isabella Clara Eugenia, will marry Albert of Austria (at the time a Roman Catholic cardinal and Archbishop of Toledo), and that the two will jointly govern the Habsburg Netherlands (now Belgium). May 13 (Keich 3, 8th day of the 4th month) The Mount Asama volcano on the Japanese island of Honshu erupts. May Tycho Brahe's star catalogue Astronomi instaurat mechanica, listing the positions of 1,004 stars, is published. June 9 The Principality of Wallachia becomes a vassal state of the Austrian Habsburgs and the Holy Roman Empire, after Michael II) signs an agreement at Prague with Rudolf II, Holy Roman Emperor to receive protection from the Ottoman Empire.[4]June 15 England invades the Caribbean island of Puerto Rico with a force of 20 ships and 1,700 men led by the Earl of Cumberland.[5]June 27 The ill-fated Dutch expedition of Jacques Mahu begins as his ship Hoop, along with the ships
Liefde, Geloof, Trouwe and Blijde Boodschap, departs from Rotterdam. June 30 England's forces capture the Castillo San Felipe del Morro, the Spanish forces, the Earl of Cumberland decides to withdraw and departs in August. July 10 John Barrose, a Burgundian fencer who has challenged all comers and killed several, is hanged for murder. Barrose's story is dramatized by playwright Ben Jonson in Every Man in His Humour, July 12 After fording the Rio Grande near what are now the Mexican city of Juarez and the U.S. city of El Paso, Juan de Oate proclaims the founding of the colony of Santa Fe de Nuevo Mjico (Santa Fe of New Mexico), with himself as the first Viceroy. Oate establishes the first capital of the New Mexico Viceroyalty at a new village, San Juan de los Caballeros, near the Pueblo Indian city of Saint-Germain-en-Laye between King Henry IV of France and Charles III, Duke of Lorraine, providing for King Henry's niece, Catherine of Bourbon, to marry Duke Charles's son, Henry of Lorraine, [7]July 22 William Shakespeare registers the rights to his new play, The Merchant of Venice, in the Register of the Stationers Company, under the title The Marchaunt of Venice or otherwise called The Jewe of Venyce.[8]July 23 Sigismund III Vasa, King of Poland and Grand Duke of Lithuania, departs from Gdask with 80 transports, several warships and exiled members of the Swedish parliament to invade Sweden. The troops land at Kalmar on July 31, and secure its surrender.[9]July Philosopher Tommaso Campanella moves from Naples to Calabria, where he will be involved in a revolt against the rule of the Spanish viceroy the following year.[10]August 14 Battle of the Yellow Ford in Ireland: Hugh O'Neill, Earl of Tyrone, gains victory over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy the following year.[10]August 14 Battle of the Yellow Ford in Ireland: Hugh O'Neill, Earl of Tyrone, gains victory over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy the following year.[10]August 14 Battle of the Yellow Ford in Ireland: Hugh O'Neill, Earl of Tyrone, gains victory over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy the following year.[10]August 14 Battle of the Yellow Ford in Ireland: Hugh O'Neill, Earl of Tyrone, gains victory over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War against the rule of the Spanish viceroy over an English expeditionary force under Henry Bagenal, in the Nine Years' War Elders, to serve in Japan as recents after the death of General Hidevoshi, is gathered at Fushimi on orders of Hidevoshi, and the members yow their allegiance to Hidevoshi, and the members yow their allegiance to Hidevoshi, and the members yow their allegiance to Hidevoshi is gathered at Fushimi on orders of Hidevoshi, and the members yow their allegiance to Hidevoshi and the members yow their allegiance to Hidevoshi and the members yow their allegiance to Hidevoshi and the members you their including Captain Jacques Mahu, who dies on September 23. September 5 (Keich 3, 5th day of the 8th month) With his own death imminent, General Toyotomi Hideyoshi's designated successor, his son Hideyori. [11] September 10 Prince Michael II of Wallachia begins the siege of Nicopolis (now Nikopol in Bulgaria). September 13 Philip III becomes the new King of Spain upon the death of his father. September 17 Second Dutch Republic fleet of Admiral Wybrand van Warwyck, and land on a Portuguese-charted island, Ilha do Cisne. Van Neck names the island Mauritius, after Maurice, Prince of Orange. Although Diogo Fernandes Pereira and sailors from Portugal had, in 1507, become the first to sight the dodo, a now extinct bird.September 18 (Keich 3, 18th day of the 8th month) General Toyotomi Hideyoshi, who united Japan and became the Chancellor of the Realm, dies after ruling 12 years. He is nominally succeeded by his 5-year-old son, Toyotomi Hideyori, with the regency exercised by the Council of Five Elders. September 25 Battle of Stngebro at Linkping in Sweden: The Catholic King Sigismund of Sweden and Poland is defeated in his attempt to resume control of Sweden by the Protestant forces of his uncle, Charles. Sigismund is defeated in his attempt to resume control of Sweden by the Protestant forces of his uncle, Charles. attempt to lure Japanese General Konishi Yukinaga into an ambush fails when a Korean Army cannon is fired too early and gives away the Korean Navy attempts to bombard the Suncheon Castle, two days after the joint Chinese and Korean land assault is driven back. Korea and Japan lose 39 ships when a large number of the fleet gets stuck in the shallow waters at low tide and the vessels are attacked by the Japanese. Yi Sunsin calls off the siege the next day.[14]November 10 (11th waxing of Tazaungmon 960 ME) In what is now the Rakhine State of Myanmar, King Min Razagyi of Arakan and the rebel leader Minye Thihathu begin their assault on Pegu, the remaining portion of the Toungoo Empire in southern Burma.[15]November 15 Pope Clement VIII authorizes the marriage between Albert of Austria and Isabella Clara Eugenia of Spain. The two will be married on April 18.December 4 In what is now part of the U.S. state of New Mexico, a dispute breaks out between the Keres people of the Acoma Pueblo (near what is now Albuquerque, New Mexico between the Keres Chief Zutacapan and the Spanish colonial envoy Juan de Zaldvar. After being refused food and shelter for himself and his 16 men, Zaldivar retaliates by pillaging Acoma, and Zutacapan orders a counterattack in which Zaldivar and 11 other men are killed.[16] Spanish troops from the Santa Fe de New Mexico colony retaliate on January 22 by carrying out the Acoma Massacre of 800 people. December 16 (Keich 3, 19th day of the 11th month, lunar calendar) Battle of Noryang: An allied Korean and Chinese fleet under Korean Admiral Yi Sun-sin and Chinese Admiral Chen Lin defeats the Japanese navy, ending the Japanese invasions of Korea (159298).[17]December 21 Battle of Curalaba: The revolting Mapuche, led by cacique Pelantaro, inflict a major defeat on Spanish troops in southern Chile; all Spanish cities south of the Bo Bo River eventually fall victim to the Destruction of the Seven Cities by the Mapuches, and all conquest of Mapuche territories by Europeans practically ceases, until the later 19th century Occupation of Araucana. December 29 Pope Clement VIII refuses to allow dispensation for Henry of Lorraine, who is Catholic, to marry Catherine of Bourbon, a Protestant Calvinist. King Henry IV of France then intimidates the Catholic Archbishop of Reims into authorizing the marriage.[7]Carnival Jacopo Peri's Dafne, the earliest known modern opera, is premired at the Palazzo Corsini, Florence.[18]Pentecost Calvinist congregations in Zurich introduce music into their services.[19]The Parliament of England passes the Vagabonds Act, that allows transportation of convicts to colonies.Illustrations of Ottoman Turkish and European riflemen, with detailed illustrations of their firearms, appear in Zhao Shizhen's book Shengipu in this year, during the Ming Dynasty of China in the Pearl River Delta. Ottoman conquest of Constantinople and the fall of the Byzantine Empire. Various historians describe it as the end of the Middle Ages. The Surrenders to Ferdinand and IsabellaGergio Deluci, Christopher Columbus arrives in the Americas in 1492, 1893 painting. The 15th century was the century which spans the Julian calendar dates from 1 January 1401 (represented by the Roman numerals MCDI) to 31 December 1500 (MD). In Europe, the 15th century includes parts of the 15th century can in retrospect be seen as heralding the "European miracle" of the following centuries. The architectural perspective, and the modern fields which are known today as banking and accounting were founded in Italy. The Hundred Years' War ended with a decisive French victory over the English in the Battle of Castillon. Financial troubles in England following the conflict resulted in the Wars of the Roses, a series of dynastic wars for the throne of England. The conflicts ended with the defeat of Richard III by Henry VII at the Battle of Bosworth Field, establishing the Tudor dynasty in the later part of the century. Constantinople, known as the capital of the world and the capital of the Byzantine Empire, fell to the emerging Muslim Ottoman Turks, marking the end of the tremendously influential Byzantine Empire and, for some historians, the end of the migration of Greek scholars and texts to Italy, while Johannes Gutenberg's invention of a mechanical movable type began the printing press. These two events played key roles in the development of the Renaissance.[2][3] The Roman papacy was split in two parts in Europe for decades (the so-called Western Schism), until the Council of Constance. The division of the Protestant Reformation in the following century.Islamic Spain became dissolved through the Christian Reconquista, followed by the forced conversions and the Muslim rebellion, [4] ending over seven centuries of Islamic rule and returning southern Spain to Christian rulers. The spices, wines and precious metals of the Bengal Sultanate [5] had attracted European traders to trade with Bengal, but the trade was subsequently lower, due to the rise of the Ottoman Empire, which introduced new taxes and tariffs against European traders. This had led to explorers like Vasco da Gama, a Portuguese traveller, also found a route to reach to India from the African coast. In Asia, the Timurid Empire collapsed and the Afghan Pashtun Lodi dynasty took control of the Delhi Sultanate. Under the world overseas, the Ming dynasty's territory reached its pinnacle. In Africa, the spread of Islam led to the destruction of the century, leaving only Alodia (which was to collapse, under pressure from the rising Songhai Empire. In the Americas, both the Aztec Empire and the Inca Empire reached the peak of their influence, but the voyages of Christopher Columbus and other European voyages of discovery in the Americas, beginning the European colonization of the founder of accounting, Luca Pacioli, by Jacopo de' Barbari (Museo di Capodimonte).1401: Dilawar Khan establishes the Malwa Sultanate in present-day central India.1402: Ottoman and Timurid Empires fight at the Battle of Ankara resulting in the capture of Bayezid I by Timur.1402: Sultanate of Malacca founded by Parameswara.[6]1402: The settlement of the Canary Islands signals the beginning of the Spanish Empire.14031413: Ottoman Interregnum, a civil war between the four sons of Bayezid I.1403: The Yongle Emperor moves the capital of China from Nanjing to Beijing [7]14041406: Regreg War, Majapahit civil war of secession between Wikramawardhana against Wirabhumi.1405: The Sultanate of Sulu is established by Sharif ul-Hshim.14051433: During the Ming treasure voyages, Admiral Zheng He of China sails through the Indian Ocean to Malacca, India, Ceylon, Persia, Arabia, and East Africa to spread China's influence and sovereignty. The first voyage, a massive Ming dynasty naval expedition ending in 1407, visited Java, Palembang, Malacca, Aru, Samudera and Lambri.[8]1408: The last recorded event to occur in the Norse settlements of Greenland was a wedding in Hvalsey in the Eastern Settlement in 1408. Main article: 1410sThe Northern Yuan dynasty and Turco-Mongol residual states and domains by the 15th century 1410: The Battle of Grunwald is the decisive battle of the PolishLithuanianTeutonic War leading to the downfall of the Teutonic Knights.1410-1415: The last Welsh war of independence, led by Owain Glyndr.1414: Khizr Khan, deputised by Timur to be the governor of Multan, takes over Delhi founding the Sayyid dynasty.1415: Henry the Navigator leads the conquest of Ceuta from the Moors marking the beginning of the Portuguese Empire.1415: Battle of Agincourt fought between the Kingdom of England and France.1415: Jan Hus is burned at the stake as a heretic at the Council of Constance.1417: A large goodwill mission led by three kings of Sulu, the Eastern King Paduka Prabhu as well as 340 members of their delegation, in what is now the southern Philippines, ploughed through the Pacific Ocean to China to pay tribute to the Yongle emperor of the Ming Dynasty.[9]1417: The East king of Sulu, Paduka Pahala, on their way home, suddenly died in Dezhou, a city in east China's Shandong province. The Yongle Emperor Zhu Di commissioned artisans to build a tomb for the king. In off-work hours, Learn about Learning enthusiast. Learn about Learning enthusiast. Learn about Learning enthusiast. plethora of applications to enhance their computing experience. However, like any digital platform, its not immune to hiccups and issues. Whether youre faced with connectivity problems, unexpected errors, or other glitches, a non-functional App Store can be a significant hindrance. This article aims to guide you through troubleshooting steps and solutions to get your App Store up and running again. Before delving into App Store-specific issues on macOS, its essential to address common underlying factors. Factors such as an unstable Wi-Fi connection, usage of a different Apples systems can affect the App Stores functionality. In this segment, well first eliminate these general concerns before tackling specialized App Store challenges. Are you able to connect to your Wi-Fi and do you have a strong signal via the network? Are other Apple devices able to connect to this Wi-Fi and access app store? Check using your iPhone or iPad.If you are able to connect to a strong Wi-Fi and access the internet without any issues, lets move forward. On the other hand, if you have performance issues with Wi-Fi after updating to the latest version of macOS, take a look at thesuggested ideas here. (particularly around the settings of 2.5ghz and 5 GHz router settings). There are often times when Apple is performing maintenance activities with the App store and other related servers. Before you make any changes to your MacBook settings to deal with the app store issues, check the Apple ID to access the app store? This is a check item for readers who tend to use multiple Apple IDs. One ID for iCloud and another ID for the App Store. Click the name in the bottom left corner. In the top right corner, clickAccount Settings. Sign in with the correct Apple ID. With Safe Mode, you can strip the OS of many unnecessary items such as system extensions, fonts, system cache files, and so on. But this also gives you the opportunity to make sure that you are signed into the correct account without anything else getting in the way. Exit Safe Mode and check if the issue is gone. How to enter Safe Mode on Intel CPUs Restart your Mac and quickly hold the Shift key when the login window appears on the screen. How to enter Safe Boot notification in the upper-right corner of the screen. How to enter Safe Mode on Apple Silicon MacsRestart your device. Then hold the power button for about 10 seconds while the device is booting up.You can release the Power button when the Startup options appear on the screen.Select your startup disk, press the Shift key, and selectContinue in Safe Mode.You can now release the Shift key and log in to your Mac.Along with major releases, Apple regularly updates its computers with various bug fixes and patches that need to be installed. And sometimes, this is a requirement before youll be able to upgrade to a newer version of macOS. So if youre having problems with the Mac App Store not working, then heres how you can check your system for any other updates before proceeding. Open the System Settingsapp on your Mac.ClickGeneralin the sidebar on the left.On the right side of the window, clickSoftware Update.Wait a few moments for your Mac to check for an update.If an update is finished downloading.When prompted, restart your Mac to install the update.Some users report that they are unable to apply updates to their apps. The App Store shows a notification for pending app updates but when you click and try to process the updates, it prompts you to Sign in and after you enter your credentials, nothing happens. Open the System Settings app on your Mac. Click your name at the top of the left sidebar. Scroll down to the bottom of the window and click the Sign Outbutton.Wait for at least 30 seconds.Restart your Mac.Once restarted, log into your Mac.Once restarted, log into your Mac.Once restarted, log into the Account menu item at the top. Sign back in into the app and next try and access the Mac App Store and check if you are able to sign in and apply the app updates. Use Terminal installs your updates manually and once you are finished, restart and check the Mac App Store again. Open the Terminal app on your Mac. Enter the following command, replacing[name] with the name of the app that you are trying to update:sudo softwareupdate -i [name]Hit the Enter or Return key on your keyboard. When prompted, enter your Macs login password and press Enter. If an update is available, youll see the progress from the Terminal window. Conversely, youll also be notified if theres no update available. If you are experiencing challenges around installing new apps on macOS, chances are that it is likely due to the new security changes on macOS. We have written adetailed postthat addresses dealing with this issue. Please check and see if it helps your situation. This is particularly the case with third-party apps that you are trying to download from the internet. The built-in macOSenhanced Gatekeeper module might be preventing these apps from installing. If you see a blank app store screen or your app store is to change the System date/time.To Change Your Time Zone to Another LocationOpen theSystem SettingsappClickGeneralin the left sidebar.On the right of the window, clickDate & Time.At the toggle next toSet time zone automatically using your current locationto theOffposition. Click the drop-down next toClosest city. Select an option that is not in the same time zone that you are in. Restart your Mac is finished restarting, go through the steps to enable bothSet time and date automatically and Set time zone automatically using your current location. If theorem system date/time change didnt work for you, you can try and restore the app store cache files on your MacBook.Quit the Menu Bar.From the drop-down menu, clickGo ToIn the prompt that appears, type~/Library/Caches/Locate the following
folders/files:com.apple.appstorecom.apple.appstorecom.apple.appstorecom.apple.appstorecom.apple.appstore to see if everything is working. On macOS, Cached Accepted Certificates that have been previously accepted by a user or system process and are temporarily stored (or cached for faster access in subsequent interactions. These certificates are a part of the systems broader security infrastructure. When you connect to a secure network service, like an HTTPS website, the service presents a digital certificate to validate its identity. The first time you encounter a certificate, macOS may prompt you to manually accept or reject it, especially if the certificate is self-signed or not issued by a recognized Certificate Authority (CA). Once accepted, the certificate gets cached so that macOS doesnt have to prompt you repeatedly for the same certificate gets cached so that macOS doesnt have to prompt you repeatedly for the same certificate. repetitive prompts, while also enhancing connection speeds for known and trusted network services. However, its worth noting that if there are ever concerns about a certificates to ensure the security of your connections.Open the Finderapp on your Mac.Click the Gobutton in the Menu Bar.From the drop-down menu, clickGo ToIn the prompt that appears, type/var/db/crls/Locate the following files:crlcache.dbRight-click the files.SelectMove to Trashfrom the drop-down menu. If prompted, enter the administrator password.Restart your Mac.Open the Mac App Store to see if everything is working. There are two types of updates that your Mac can perform, and you might not have even known that. The first of which is a macOS combination update that contains all of the changes since the original release of the macOS version. These combo updates can be used to update your Mac from any version within the major OS release. The second option is called a Delta update, but only contains files that changed since the last update. Usually, these updates are much smaller and can be used to update macOS from the previous version. The only exception is if you are going from one major release to another. The distinctive feature of a combo update is its ability to address issues from any of the preceding updates. Its possible to reinstall a combo update on a Mac to resolve issues, even if the Mac is currently on the latest macOS version. However, its imperative to ensure a backup is in place before initiating any type of update, whether delta or combo. You find combo updates atApples Downloads site, as these will not appear via the Software Update area in System Settings. Another option that you have in order to try and get the App Store to start working again, is to create a new Administrator User on your Mac. Heres how you can do so: Open the System Settings on your Mac. In the left sidebar, scroll down and clickUsers & Groups.Click theAdd Userbutton.Enter your current admin password.Click theUnlockbutton.From the window that appears, click the drop-down box next toNew User.SelectAdministratorfrom the list.Enter theFull NameandAccount Name.Create a unique password that you just used in the Verify section. Provide a Password Hint, if necessary. Click the Create Userbutton. Now that you have created a new user, youll want to switch over to that account from your current one. Heres how to do so: Click the Apple logoin the top left corner of the Menu Bar. From the drop-down menu that appears, click Log Out After you have signed out, select the newly created user account from the Lock Screen.Sign in with the password that you created.Once you have signed in, open the Mac App ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work, try signing in with a different Apple ID.If this doesnt work apple ID.If and updates on macOS. While occasional issues can disrupt this experience, the solutions outlined in this article should help in restoring normalcy. Always remember to keep your Mac updated with the latest version of macOS and maintain regular backups to preemptively tackle potential issues. Should problems persist, consider reaching out to Apple Support for further assistance. Obsessed with tech since the early arrival of A/UX on Apple, Sudz (SK) is responsible for the original editorial direction of AppleToolBox. He is based out of Los Angeles, CA.Sudz specializes in covering all things macOS, having reviewed dozens of OS X and macOS developments over the years. In a former life, Sudz worked helping Fortune 100 companies with their technology and business transformation aspirations. If youre facing issues with your App Store, which can be frustrating when youre trying to download apps or updates. In this article, well explore the possible causes of this issue and provide troubleshooting steps to help you resolve it.Learn how to troubleshoot and fix App Store not working on macOS. Find out how to update macOS, reset the App Store cache, disable VPN, and more.Why is My App Store Not Working on Mac? There could be several reasons why your App Store is not working on Mac. Lets take a look at some of the common causes: Software on your Mac can interfere with the functioning of the App Store. If your macOS is not up to date, it may affect the performance of the App Store.Network connection problems: Poor or unstable network connection is weak, you may face problems while accessing the App Store. Select Reinstall macOS from the utility menu and follow the on-screen instructions. Contact Apple Support for further assistance. They can provide personalized solutions and help you resolve any underlying issues that may be causing the problem. Conclusion In conclusion, if youre facing issues with your App Store on Mac, there could be various reasons behind it, such as software update problems, network connection, updating macOS, resetting
App Store cache, disabling VPN, checking Apple ID, and verifying date and time settings to resolve the issue. If the problem persists, you may need to take advanced troubleshooting steps like reinstalling macOS or contacting Apple Support for further assistance. If the App Store is not working on your Mac, possible fixes include: Force quitting it, disabling any running VPNs, restarting your Mac, using Safe Boot mode, updating macOS, signing out, checking the linked Apple ID, and resetting default keychains. It's also possible that Apple's store front, which makes it all the more frustrating when the App Store is not clear why Here are some fixes you can try to get the Mac App Store working again. Force Quit the Mac App Store Sometimes quitting an app isn't enough. macOS tends to hang around and wait for the app to finish up what it's doing (like saving a document) before it will quit. If the App Store app has crashed and is not working, it may never close using a simple "Quit" command. In this case, you need to take matters into your own hands. Right-click on the Mac App Store icon in your dock, then hold the "Option" key on your keyboard. You'll see "Quit" change to "Force Quit" which you can use to kill the application immediately. You can also force quit apps using Activity Monitorif they're not working Once the app has closed (you will no longer see a dot next to its dock icon to indicate that it's still running, and it will no longer appear in the processes list in Activity Monitor) try opening it again. If it was a simple crash that caused the problem, the Mac App Store should be working again. A VPN routes your traffic through an end-to-end encrypted "tunnel" to hide your browsing activity from your ISP, hide your IP address, and other privacy-related things. Sometimes a VPN can cause problems, so try turning your VPN off altogether if the Mac App Store seems to be having connectivity problems, so try turning your VPN off altogether if the Mac App Store seems to be having connectivity problems. This depends on which VPN service and client you are running on your Mac, but if turning your VPN off fixes the issue, you may want to consider it in the future. Restarting your computer fixes all sorts of problems, and a dodgy Mac App Store may just be one of them. causes problems for applications or services that rely on them. Starting macOS from cold restarts all of these processes, so it's always worth a shot. Click on the "Apple" logo, then choose "Restart" and wait to reboot your Mac. Restarting problems. It also prevents all of these processes, so it's always worth a shot. software like startup items from starting up as they normally would. It can take a little longer than a standard boot, but it's worth doing so if you're encountering unexplainable problems that nothing else seems to fix. The process for starting your Mac up in Safe Mode differs slightly, depending on which model you have. Click on the Apple logo in the top-left corner of the screen, then choose "About This Mac" and pay attention to the "Chip" description. If you have an Apple Silicon Mac with an M1 or later (models produced after 2020): Use Apple > Shut Down to turn your Mac off completely. Once your computer is off, press and hold the power button (Touch ID button) until "Loading startup options" appears. Select your startup volume, then press and hold the Shift key. Click "Continue in Safe Mode" to proceed with a safe boot. If you have an Intel-based Mac (produced in 2020 or earlier): Use Apple > Shut Down to turn your Mac off completely. Once your computer is off, press the power button (Touch ID button), then immediately press and hold the Shift key. Log in as normal (you may need to do this twice). You can confirm you're in Safe Mode by clicking on the Apple logo in the top-left corner of the screen, then holding the "Option" button on your keyboard and selecting "System Information" from the list. Click on the "Software" heading in the sidebar, then look for "Safe" next to "Boot Mode." (If you see "Normal" you're still in standard boot mode; try again.) Once you've booted up in Safe Mode, restart your Mac as normal and try launching the Mac App Store and other things not working in macOS. (Updates can occasionally introduce new problems, too.) You can do this under System Settings > General > Software Update on macOS 13 Ventura, or System Preferences > Software Update on earlier versions of macOS. Here you can find two types of updates. There's the standard "patch" that incrementally fixes bugs and improves system performance (for example, macOS 13.0.2), or you may see a much larger system upgrade that updates your Mac to the newest version of macOS (for example, macOS 13 Ventura). Sometimes the problem if the App Store keeps asking for a password. With the Mac App Store app open and in focus, click on Store at the top of the screen, then choose "Sign Out" at the bottom of the list. Now sign in again using the Store > Sign Out/Sign In option, download an app they have purchased, then sign back into your own account? While this may sound like a solid way to share purchases with friends and family, it introduces problems when it comes to updating apps. This can cause the Mac App Store to constantly request a password, the app cannot update, and the relentless requests continue. You'll either need to know the password associated with the account or simply delete the app from your Applications folder. Sometimes the problem isn't on your end but is instead caused by a service outage. Before you proceed with the next step, double-check on Apple's System Statuspage that the Mac App Store or associated services aren't having any problems. If they are, consider waiting it out before going any further. There's some evidence (like this Reddit post) that suggests an unresponsive Mac App Store can be resolved by resetting default local and iCloud keychains. In addition to the original poster, many other commenters confirm that the solution worked. This is a drastic move since you'll lose all stored passwords and will need to log in system-wide again. Another Reddit user describes all fingerprints associated with Touch ID and saved passwords being disabled, extensions being removed from Safari, and contacts appearing associated with Touch ID and saved passwords being disabled on a linked iPhone, Handoff being disabled, extensions being removed from Safari, and contacts appearing associated with Touch ID and saved passwords being disabled on a linked iPhone, Handoff being disabled on a lin "Unknown" in FaceTime. In time, these issues were resolved (and the associated settings can be turned on again). To go ahead, launch Keychain Access at the top of the screen followed by Settings (or Preferences). Now hit "Reset Default Keychains." to proceed. The Mac App Store is just one of many ways you can install and update apps on your Mac. Some apps are available both on the App Store won't load or work properly on your Mac computer, there are a number of ways to troubleshoot the problem. Hollis Johnson/Business Insider and start reading now. On rare occasion, you might find that the App Store app on your Mac is not working. There may be any number of problems keeping the App Store app from working, including unreliable internet, Screen Time restrictions, and even a VPN connection. Here are seven of the most common fixes for the App Store is an essential tool for installing new apps and games on your Mac, but you might, on rare occasion, run into glitches in which the app won't run, freezes, or crashes randomly. This can be frustrating and result in the inability to get work done but there are a number of ways to troubleshoot the problem and get up and running again quickly. Here are seven ways you can fix the App Store when it won't load on your Mac. Check your internet connection The first thing you should check if you're experiencing problems with the Mac App Store is to see if you have a solid and reliable internet connection. Make sure your Wi-Fi is on and connected to your local network and that you can stream video in a web browser (try YouTube, for example). If in doubt, run Google's Internet Speed Test search for "speed test" and then, in the Google search results, click Run Speed Test. You won't be able to run the App Store reliably without a good internet connection. The Internet Speed Test can confirm if your internet speed Test can confirm if your internet connection. The Internet speed Test can confirm if your internet connection is reliable enough for the App Store service are known to occasionally experience service outages. You can open Apple's System Status page in a browser and see which are offline, if any. Check the Mac App Store app. Open the System Status page and make sure the Mac App Store is green. Dave Johnson Check to see if the App Store is restricted Apple gives you the option to restrict usage of the App Store in Screen Time settings. Especially handy as a parental control feature, it's possible to disable the ability to download apps and other content. Check to see if this is your problem: 1. Click the Apple logo at the top left of the desktop and then choose System Preferences. Oper System Preferences from the Apple menu. Dave Johnson 2. Click Screen Time. 3. In the navigation pane on the left, click Content & Privacy. 4. Click the Stores tab. 5. For each option, make sure the setting allows you to download the desired content. If any of the content in the App Store is restricted, the store may appear to not be working properly. Dave Johnson Quit and restart the App Store app is misbehaving, it might be because of some temporary or intermittent software glitch. Forcing the App Logo at the top left of the desktop and choose Force Quit. In the Force Quit Applications window, click App Store and then click Force Quit. Force Quit the App Store, then start it again to see if that solves your problem. Dave Johnson Stop using
a VPN Virtual Private Networks can interfere with the normal operation of the App Store. If you use a VPN and have trouble getting the App Store to work properly, temporarily disconnect or disable your VPN. This process will vary depending upon which VPN software you are using on your Mac. Sign out of and then back into your Apple ID. Click the Apple ID Another remedy that sometimes corrects a problematic App Store: signing out of and then back into your Apple ID. Preferences. Click Apple ID and then, in the navigation pane on the left, click Overview. Click Sign Out, complete the signout process, and sign back in again. Dave Johnson Unfortunately, if you've gotten this far, you have exhausted most of the best options for getting the App Store up and running again. It's always possible, though, that a bug or software incompatibility is interfering with the App Store and keeping it from working properly. To see if this is the issue, check for and install any system updates that are waiting for you. Click the Apple logo at the top left of the desktop and then choose System Preferences. Click Software Update and then, if there's an update ready, click Update Now. And make sure that the checkbox beside Automatically keep my Mac up to date is selected. A software incompatibility that's keeping App Store from working might be fixed with a system update. Dave Johnson A white circle with a black border surrounding a chevron pointing up. It indicates 'click here to go back to the top of the page.' Mac users download and update approved applications, macOS in the App Store, Apple devices. Most of the time, the App Store works well on Mac, but inevitably, it fails sometimes. You may encounter the issue of the App Store not working on MacAnd there are various situations when the App Store is not working on Mac, including: The App Store shows a black screen. You can't download/update apps in the App Store. The update in the App Store is not working on Mac, including: The App Store is not w Store never finishes and is stuck. If any of these cases befalls you, you can follow our tutorial to fix the App Store not working issue on your Mac. Why is my App Store not working applications. And the reasons behind it are different according to the specific situations. Generally, the malfunctioned Mac App Store is caused by: Poor internet connection. An outage of Apple ID logged into, Faulty system cache files. Problems with the user account. Here, we are going to provide detailed methods to fix the dysfunctional App Store on MacBook Air/Pro/iMac. Based on the different scenarios and reasons for the Apple Store back on track. Check Internet ConnectionCheck the status of Apple servers check the date and time settings and relaunch the App Store Check in track.
