Box-and-Whisker Plot

Sheet 1

- 1) The teacher recorded the math scores of top ten students in grade V. Their scores are as follows.

86, 92, 75, 81, 93, 99, 89, 90, 84, 93

Make a box-and-whisker plot.

Min: _____, Q₁: _____, Q₂: _____, Q₃: _____, Max: _____

- 2) Eleven staff from a university visited a museum. The below given data shows their ages noted by a volunteer of the museum to issue tickets.

42, 46, 50, 52, 53, 50, 51, 38, 48, 47, 43

Make a box-and-whisker plot.

Min: _____, Q₁: _____, Q₂: _____, Q₃: _____, Max: _____

- 3) The figures shown below are the sales of twelve vegetables (in pounds) at a supermarket in a day.

24, 34, 98, 44, 72, 56, 52, 50, 38, 22, 20, 60

Make a box-and-whisker plot.

Min: _____, Q₁: _____, Q₂: _____, Q₃: _____, Max: _____Printable Math Worksheets @ www.mathworksheets4kids.com**Worksheet 10****Question 1: 50 People**

The following table of the San City shows you about how many people are present, for analysis at, station C, during the morning of that time. The firm employs 11 unskilled employees in station. For other work, the numbers of working professionals and non-manual workers:

Category	Number of People
Unskilled workers	11
Skilled workers	10
Professionals	10
Non-manual workers	10
Total	50

Answer these questions on the number of people reported by each category (Based "Total" to 2 decimal places)

a. Mean: _____

b. Median: _____

c. Mode: _____

Question 2: 40 People

Several firms employ 40 persons in the morning shift. Only one firm employs 10 unskilled workers and 10 are professionals. The remaining 20 workers are divided into 8 manual workers and 12 non-manual workers. Answer these questions based on the following data (Based "Total" to 2 decimal places)

a. Mean: _____

b. Median: _____

c. Mode: _____

Question 3: 100 Pounds

The following table includes your knowledge of 1000 students from Lincoln University. This table includes low and high-income areas. The following table also includes income > 100k, total income of working, the working area, and the person on 100k per year.

Year	Income	Working Income	Income Area	Population (in lakhs)
2000	100000	100000	100000	100
2001	100000	100000	100000	100
2002	100000	100000	100000	100
2003	100000	100000	100000	100
2004	100000	100000	100000	100
2005	100000	100000	100000	100
2006	100000	100000	100000	100
2007	100000	100000	100000	100
2008	100000	100000	100000	100
2009	100000	100000	100000	100
2010	100000	100000	100000	100
2011	100000	100000	100000	100
2012	100000	100000	100000	100
2013	100000	100000	100000	100
2014	100000	100000	100000	100
2015	100000	100000	100000	100
2016	100000	100000	100000	100
2017	100000	100000	100000	100
2018	100000	100000	100000	100
2019	100000	100000	100000	100
2020	100000	100000	100000	100

BOX AND WHISKER PLOTS #1 Name: _____ Date: _____

Answer the following questions using the provided Box and Whisker Plots.

1. What is the range? _____

2. 13 would be called the _____

3. What is the median? _____

4. What fraction represents numbers between 25 - 27? _____

5. What is the upper median? _____

6. The upper extreme is what? _____

7. What is the lower median? _____

8. What is the upper median? _____

9. What is the median? _____

10. What is the range? _____

11. A quartile represents what percentage of numbers? _____

12. 75% of the numbers are smaller than what? _____

13. 4 would be called the _____

Interquartile range with example. Interquartile range = . Interquartile range formula in excel. Interquartile range problems and answers. Interquartile range formula in statistics.

The interquartile range, often denoted IQR, is a way to measure the spread of the middle 50% of a dataset. It is calculated as the difference between the first quartile (Q1) and the third quartile (Q3) of a dataset. Note that quartiles are simply values that split up a dataset into four equal parts. The IQR is often used to measure the spread of values in a dataset because it's known to be resistant to outliers. Since it only tells us the spread of the middle 50% of the dataset, it isn't affected by unusually small or unusually large outliers. This makes it a preferable way to measure dispersion compared to a metric like the range, which simply tells us the difference between the largest and the smallest values in a dataset. This tutorial explains how to calculate the IQR for a given dataset in Google Sheets. Example: How to Calculate IQR in Google Sheets Use the following steps to calculate the interquartile range (IQR) of a dataset in Google Sheets. Step 1: Enter the data. First, enter all of the values of a dataset into one column: Step 2: Calculate the first and third quartiles. Next, we'll use the QUARTILE() function to calculate the first (Q1) and third (Q3) quartiles of the dataset. Note that this function uses the following syntax: QUARTILE(data, quartile number) where: data: An array of data values quartile number: The quartile to calculate The following image shows the formulas to use to calculate Q1 and Q3 for this dataset: Step 3: Calculate the IQR. Lastly, we can subtract the first quartile (Q1) from the third quartile (Q3) to obtain the interquartile range: The interquartile range turns out to be 16. This tells us the spread of the middle 50% of values in our dataset. Additional Resources How to Calculate the Interquartile Range (IQR) in Excel How to Calculate Standard Deviation in Google Sheets How to Calculate a Five Number Summary in Google Sheets How to Make a Box Plot in Google Sheets Box-and-whisker plot worksheets have skills to find the five-number summary, to make plots, to read and interpret the box-and-whisker plots, to find the quartiles, range, inter-quartile range and outliers. Word problems are also included. These printable exercises cater to the learning requirements of students of grade 6 through high school. Grab some of these worksheets for free! Five-Number Summary - Level 1 Level up identifying the upper and lower quartiles, maximum and minimum values, and median, necessary to make box and whisker plots, from data sets involving decimal values. Making Box and Whisker Plots: Standard | Level 2 Climb up the ladder in making box plots with these worksheets! Observe the data sets that involve more than 10 data values and also decimals, figure out the elements of the box plot, and create it. Read and Interpret: Level 1 Dig into practice with these handouts for 6th grade and 7th grade students. Read the scenarios and interpret the box-and-whisker plots to answer the word problems based on the five-number summary. Read and Interpret: Level 2 These pdf worksheets for grade 7 and grade 8 have exclusive word problems to find the five-number summary. Five-Number Summary - Level 2 Level up identifying the upper and lower quartiles, maximum and minimum values, and median, necessary to make box and whisker plots, from data sets involving decimal values. Making Box and Whisker Plots: Standard | Level 2 Climb up the ladder in making box plots with these worksheets! Observe the data sets that involve more than 10 data values and also decimals, figure out the elements of the box plot, and create it. Read and Interpret: Level 1 Dig into practice with these handouts for 6th grade and 7th grade students. Read the scenarios and interpret the box-and-whisker plots to answer the word problems based on the five-number summary. Read and Interpret: Level 2 These pdf worksheets for grade 7 and grade 8 have exclusive word problems to find the five-number summary. Five-Number Summary - Level 3 Level up identifying the upper and lower quartiles, maximum and minimum values, and median, necessary to make box and whisker plots, from data sets involving decimal values. Making Box and Whisker Plots: Standard | Level 3 Climb up the ladder in making box plots with these worksheets! Observe the data sets that involve more than 10 data values and also decimals, figure out the elements of the box plot, and create it. Read and Interpret: Level 1 Dig into practice with these handouts for 6th grade and 7th grade students. Read the scenarios and interpret the box-and-whisker plots to answer the word problems based on the five-number summary. Read and Interpret: Level 2 These pdf worksheets for grade 7 and grade 8 have exclusive word problems to find the five-number summary. Five-Number Summary - Level 4 Level up identifying the upper and lower quartiles, maximum and minimum values, and median, necessary to make box and whisker plots, from data sets involving decimal values. Making Box and Whisker Plots: Standard | Level 4 Climb up the ladder in making box plots with these worksheets! Observe the data sets that involve more than 10 data values and also decimals, figure out the elements of the box plot, and create it. Read and Interpret: Level 1 Dig into practice with these handouts for 6th grade and 7th grade students. Read the scenarios and interpret the box-and-whisker plots to answer the word problems based on the five-number summary. Read and Interpret: Level 2 These pdf worksheets for grade 7 and grade 8 have exclusive word problems to find the five-number summary. Five-Number Summary - Level 5 Level up identifying the upper and lower quartiles, maximum and minimum values, and median, necessary to make box and whisker plots, from data sets involving decimal values. Making Box and Whisker Plots: Standard | Level 5 Climb up the ladder in making box plots with these worksheets! Observe the data sets that involve more than 10 data values and also decimals, figure out the elements of the box plot, and create it. Read and Interpret: Level 1 Dig into practice with these handouts for 6th grade and 7th grade students. Read the scenarios and interpret the box-and-whisker plots to answer the word problems based on the five-number summary.
