The History of Motorcycle Clubs The first motorbike clubs date back to the early 1900s and broke through during and after WW2 for people who loved rebellion and adventure. Though many outlaw MCs were involved in drug trafficking and criminal activities then, they are mostly legal
today. During WW2, these gangs drew in millions of thriller-seekers craving an adrenaline rush. Plus, after the war, veterans found it extremely difficult to return to their normal civilian life, as they longed for something exciting to fight for, hence the increase in yearly motorcycle club members. By then, most clubs started to adopt a strong,
rebellious image and aggressive attitudes. That, coupled with the bikes' dangerous nature, did not leave a very positive impression among Americans, and dangerous biker gangs involved with murder and drug smuggling like Hollister and Hells Angels motorcycle clubs only fueled that perception further. But that is a thing of the past; nowadays, most
motorbike clubs comply with the AMA rules (short for American Motorcyclist Associations) and open the door to law-abiding members only. Even outlaw MCs are no longer inherently engaged in illegal activities despite their titles; they are simply a group of people from different ages and sectors with a shared passion for riding.
