You can get apps, games, and digital content for your device using the Google Play Store app.The Play Store app comes pre-installed on Android devices that support Google Play, and can be downloaded on some Chromebooks. On your device, go to the Apps section. Tap Google Play Store . The app will openand you can search and browse for content to download. If you have issues locating the Play Store app, or opening, loading or downloading content in the app, it could be due to a number of reasons. To troubleshoot these issues, try the following topics:I can't find the Play Store App The Play Store doesn't open or load any content Downloads from the Play Store don't work Post to the help community Get answers from community members You can customize Chrome on your desktop by adding extensions from the Chrome Web Store. Install an extension Important: You can't add extensions when you browse in Incognito mode or as a guest. Open the Chrome Web Store. Find and select the extension you want. Select Add to Chrome. Some extensions will let you know if they need certain permissions or data. To approve, select Add extension. Important: Make sure you only approve extensions that you trust. To use the extension, select the icon to the right of the address bar. If you're using a computer through your work or school, your organization might block some extensions.Install on your phone Important: Make sure you're signed in to Chrome with your Google Account. Learn how to sign in and sync in Chrome. On your phone, open Chrome . Find the extension you want. Tap Add to Desktop. To confirm, tap Add to Desktop. Tip: The next time you open Chrome on your computer, you'll get a message that the extension was installed. If the extension needs some permissions, you'll be asked. To approve, select Enable extension.Install with a Windows or Mac application Sometimes, when you install an application on Windows or Mac, it also installs a Chrome extension. The next time you open Chrome: To grant permissions and use the extension, select Enable. To delete the extension, select Remove. Install with Enhanced protection For additional protection when you install a new extension from the Chrome Web Store, you can use Safe Browsing's Enhanced protection. If you enable Enhanced protection in Chrome, it warns you when an extension you want to install isn't trusted. Extensions are considered trusted when they're built by a developer who follows the Chrome Web Store Developer Program Policies. For new developers, it generally takes a few months to become trusted. Eventually, we strive for all developers with compliant extensions to reach this status upon meeting our developer program policies. When you try to install an extension, a dialog appears. If the extension you're about to install isn't trusted by Enhanced protection, it says This extension is not trusted by Enhanced Safe Browsing. To install the extension anyway, select Continue to install. To abort the installation, select Close. If the extension is trusted by Enhanced protection, to complete the installation, select Add extension. Manage your extensions On your computer, open Chrome. At the top right, select More Extensions Manage extensions. Make your changes: Turn on/off: Turn the extension on or off. Allow incognito: On the extension, select Details. Turn on Allow in incognito. Fix corruptions: Find a corrupted extension and select Repair. Confirm by selecting Repair extension. Allow site access: On the extension, select Details. Next to Allow this extension to read and change all your data on websites you visit, change the extensions site access to On select, On specific sites, or On all sites. Remove possible malware If you repaired an extension but it's still corrupted, a suspicious program might be changing this extension's files. On Windows, Mac, or Linux computers, run an antivirus or anti-malware software. Remove any software programs that may be affecting Chrome. On all computers, repair the extension: On your computer, open Chrome. At the top right, select More Extensions Manage extensions. Find a corrupted extension and select Repair. Confirm by selecting Repair. If this doesn't work, visit the Chrome Help Forum and share your situation with us. Let extensions read and change site data Some extensions need permission to read and change site data. You can change your extensions permissions anytime. Important: When you grant or cancel these permissions, it will only affect extension sites that match the extension's host permissions. Extensions that change lower-level network access through VPNs or proxy settings aren't affected by the change in permissions. On your computer, open Chrome. At the top right, select Extensions . Select More point to "This can read and change site data." Decide which permission to give the extension: When you select the extension: This setting only allows the extension to access the current site in the open tab or window when you select the extension. If you close the tab or window, you'll have to select the extension to turn it on again. On [current site]: Allow the extension to automatically read and change data on the current site. On all sites: Allow the extension to automatically read and change data on all sites. Add or remove access to a specific site On your computer, open Chrome. At the top right, select More Extensions Manage extensions. On the extension, select Details. Under Permissions, add or remove a site: Add: To the right of Allowed sites, select Add. If you can't find this option, change Allow this extension to read and change all your data on websites you visit to On specific sites. Remove: To the right of the site, select More Remove. Uninstall an extension To the right of your address bar, look for the extension's icon. Right-select the icon and select Remove from Chrome. If you don't find the extension's icon: On your computer, open Chrome. At the top right, select More Extensions Manage extensions. On the extension you want to remove, select Remove. To confirm, select Remove.Use extensions on any computer To use your extensions on any computer, sign in to Chrome.Arrange extensions on your toolbar To the right of your address bar, find your extensions' icons. On your computer, open Chrome. Drag the extension's icon to its new place. Hide extensions To hide individual extensions: Right-select the icon. Select Unpin. To find your hidden extensions,select Extensions . Show extensions To bring hidden extensions back to your toolbar: Select Extensions . Find the hidden extension. Select Pin . Important: Some extensions don't have this option. Unsupported extensions To better protect your privacy and security, Chrome and the Chrome Web Store require extensions to be up-to-date with new requirements. With this, Chrome may disable extensions that don't meet these requirements. If an extension isn't supported and is disabled, you can take the following actions.Find an alternative On your computer, open Chrome. At the top right, select More Extensions Manage Extensions. Find the unsupported extension. Select Details More Find Alternatives . Add an extension from the Chrome Web Store. Remove the extension On your computer, open Chrome. At the top right, select More Extensions Manage Extensions. Find the unsupported extension. Select Remove. Temporarily enable the extension Important: You can only re-enable an extension for a limited period of time after it has been disabled. We recommend you find an alternative extension before it's permanently disabled. On your computer, open Chrome. At the top right, select More Extensions Manage Extensions. At the bottom right, select the toggle of the unsupported extension you want to enable. Tip: If your browser is managed, your administrator can re-enable unsupported extensions with Chrome Enterprise Policy. Learn how to check if your Chrome browser is managed. You can browse the web on your iPhone or iPad with Chrome. On your iPhone or iPad, open App Store. In the search bar, enter Chrome. Tap Get. To install, follow the on-screen instructions. If prompted, enter your Apple ID password. To start browsing, tap Open. To open Chrome from your Home screen, tap Chrome . Post to the help community Get answers from community members To easily manage and share content across all of your devices and the cloud, use Google's desktop sync client: Drive for desktop. If you edit, delete or move a file on the Cloud, the same change happens on your computer and devices, and vice versa. In this way, your files are always up to date and can be accessed from any device. You can use Drive for desktop to: Open files stored on the Cloud directly on your computer. Find and organize your files in your computer's file system without using storage space. Sync folders from your computer to Google Drive. When you sync, your files download from the cloud and upload from your computer's hard drive. After you sync, your computer's files match those in the cloud. Your files stay up to date and accessible, any change you make applies across devices. Save files and folders for offline use. This includes files from shared drives. Collaborate on Microsoft Office files in real time. If you use Outlook on Windows with a work or school account, send and save files with Microsoft Outlook. Important: Before you start, check that your operating system is compatible with Drive for desktop. Download Drive for desktop: DOWNLOAD FOR WINDOWS Open "GoogleDriveSetup.exe." Follow the on-screen instructions. Tip: If you use a work or school account, you might not be able to use Drive for desktop or your organization might have to install it for you. If you have questions, ask your administrator. On Drive for desktop, at the bottom right, in the system tray, you can find the Drive for desktop menu . Tip: To Show hidden icons, click the arrow. To make it easier to find Drive for desktop when it's closed, you can pin it. To add Drive to the Start menu: In your Start menu, right click Drive Pin to Start. To add Drive to the taskbar: In your Start menu, right click Drive Pin to Taskbar. Important: Before you start, check that your operating system is compatible with Drive for desktop. Download Drive for desktop: DOWNLOAD FOR MAC Open GoogleDrive.dmg. Follow the on-screen instructions. Tip: If you use a work or school account, you might not be able to use Drive for desktop. Your organization must install it for you. If you have questions, ask your administrator. On Drive for desktop, at the top right, in the menu bar, you can find the Drive for desktop menu . To make it easier to find Drive for desktop when it's closed, you can pin it. To add Drive to your Dock: In the Applications folder, drag the Drive app to the left side of the recently used apps separator line. Sign in to Drive for desktop Sync files and folders to Drive for Desktop For this same video with audio descriptions, go to Sync files and folders to Drive for Desktop. When you first open Drive for desktop, you receive a notification Google Drive would like to start syncing. Click OK. On your computer, open Drive for desktop . You can sync files from your computer to Google Drive and backup to Google Photos. On your computer, open Drive for desktop . Click Settings Preferences. On the left, click Folders from your computer. Select an option: Sync with Google Drive: Files you change in the synced folder reflect on Drive. Drive changes reflect on your computer. Synced folders shows under "Computers." Back up Google Photos: Only photos and videos upload. Photos or videos you delete in one place don't delete in another. Edits upload as new images. You can find your photos and videos from any device online or on the Google Photos mobile app. Use Drive for desktop with macOS Sync to Google Drive & Google Photos Important: If you only store photos and videos, we recommend you backup to Google Photos. If you store your files in photos and videos, they upload twice and use more of your Google storage. Network Attached Storage (NAS) only supports backups to Google Photos. Important: If you have multiple Apple Photos libraries, only the System Photo Library syncs to Google Photos. You can sync all Apple Photos libraries in Drive. If you sync an Apple Photos library with Drive, everything syncs. We do not recommend you make changes to these files from another computer or in the cloud as it can corrupt your library. Your System Photo Library is the only library that works with iCloud Photos, Shared Albums, and My Photo Stream. If you only have one photo library, then it's the System Photo Library. Otherwise, the first photo library that you create or open in Photos is your System Photo Library. When you download photos and videos from your iCloud and upload them to Google Photos, it temporarily uses your Hard drive space. Learn more about backing up photos & videos. Access your files when they're synced On your computer, click your name Google Drive . You can find several options based on your Drive usage: My Drive: Contains your own personal files and folders. Shared Drives: Contains files and folders others share with you. Other Computers: Displays files synced from other computers connected to your Google Account. Double click the file you want to open. Files created in Google Docs, Sheets, Slides, or Forms open in your web browser. Other files, like Word docs or .pdf files, open in their default programs on your computer. Tip: If your Drive and "My Drive" folder is empty, you can't find the "Shared Drives" or "Other Computers" views. Customize your Drive for desktop settings Improve your Drive for desktop experience with Advanced Settings. You can: Customize sync preferences. Enable or disable real-time presence with Microsoft Office. Customize Google Photos settings. Customize general settings, such as automatic launch, hotkeys, and proxy settings. Learn how to customize you Drive for desktop settings. Open files & folders offline Search for your Drive files To find your files in Drive, search in Drive for desktop. When you search in Drive for desktop, rather than in Windows Search or macOS Spotlight, it ensures that your search includes all files from the Drive streaming location. On your computer, open Drive for desktop . Click Search . Enter your search terms. Tip: You can use the same advanced searches as in Drive web. Open your file. If the file is on your computer, it opens with the associated application. Otherwise, it opens in Drive web. Tip: To open the search window you can also use the search hotkey combination. Work on MS Outlook & Office files Mirroring My Drive Mirroring and streaming are two ways to sync your files. Folders from your computer can only be mirrored. Shared drives and other computers can only be streamed. My Drive can either be mirrored or streamed. When Drive for desktop is installed, the My Drive folder is streamed. You can update your preferences and choose to mirror or stream My Drive after installation. Learn about streaming and mirroring options with Drive for desktop. Learn how to find and fix errors in Drive for desktop In Drive for desktop, under Activity, a Some errors occurred banner displays. To display the list of errors, you can either: Click the link in the banner. Click Settings Error list. Learn more about how to fix errors.
