Can you give us tutorials and details about the changes you've made in the server, and client side.. Then how do we use the tools you've provided..?? No. This is partly why I didn't want to release it. People will have it 1,000 times easier now and still complain and won't investigate or try themselves. There is literal documentation on what can be done in the files released. Especially when I also made a ReadMe file for the .exe provided. 04/06/2025, 18:29 #10 elite*gold: 0 Join Date: Mar 2025 Posts: 10 Received Thanks: 0 Quote: Originally Posted by SoulessKiller No. This is partly why I didn't want to release it. I have found out so much information from going through the files and taking the time to read what has been provided. If you really want to go forward with a Zero Online server, You need to put in the effort to actually learn and everything that has been provided, Is more than enough information - If you cannot work out a work around to the .exe before locating the Worlds.dat then I'm sorry but you may have further issues trying to understand the more complicated side of editing stuff.Thank you again Souless for this! You are truly a legend and i'm sorry if you are getting spammed asking for help due to this release, You don't deserve that at all! 04/07/2025, 15:45 #12 elite*gold: 0 Join Date: Dec 2024 Posts: 6 Received Thanks: 0 what is the decryption key? 04/07/2025, 17:27 #13 elite*gold: 0 Join Date: Mar 2025 Posts: 10 Received Thanks: 0 how to register new account? test - test can log in to the client 04/07/2025, 17:44 #14 elite*gold: 0 Join Date: Dec 2024 Posts: 6 Received Thanks: 0 Quote: Originally Posted by SoulessKiller Where do I edit the ZPMall?
