ANATOMY Body Cavities and Plasma	
Name _____	K. S. G.
PLANT CAVITIES: <a href="http://bioweb.psu.edu/~jacobson/">http://bioweb.psu.edu/~jacobson/</a>	
1. Label the following:	<ul style="list-style-type: none"> <li>• DORSAL CAVITY</li> <li>• VENTRAL CAVITY</li> </ul>
2. Location of the smaller cavities within the head:	Sphen., OVAL, PULM., ORBITAL
3. Label the divisions of the VENTRAL CAVITY.	
4. Describe the relationship between the skeletal system and the dorsal cavity. Why is this relationship important?	<p>Start post. vert. begin at</p> <p><b>PROTECT</b> the brain and spinal cord, which are part of the <b>spinal nerves</b>.</p>
5. Name organs found within the VENTRAL CAVITY.	
6. Label the divisions of the ventral cavity. (Be sure to label the diaphragm!)	
7. What structures are located within the pleural cavity?	<b>LUNGS</b>
8. What is located within the peritoneal cavity?	<b>Intest.</b>
9. List structures found within the abdominal/pelvic cavity.	<b>Gastroint., intestines, reproductive organs</b>
10. How is the ventral cavity protected?	Skeletal (skull, vertebral column), membranes
11. Complete the Quiz! Get a STAMP for completion!

# TERMINOLOGY

- On 1  
1. Color the four body planes in quiet, pastel colors.  
2. Color the anatomical directions (arrows) in bright or dark colors for emphasis.  
3. The body itself is not to be colored.  
A precise set of terms and planes have evolved to describe positions, relationships, and directions within the human body. To avoid confusion, there are always three planes of reference in standard anatomical position: standing erect, palms of the hands forward.

Planes are fixed lines of reference along which the body is often divided (sectioned) to facilitate the viewing of structure. By studying a region from different planes, the student can better understand the spatial planes of reference. A 3-dimensional perspective can be obtained.

Terms of position and direction describe the position of one organ relative to another, usually along one of the three major body planes.

## BODY PLANES. MEDIAN.

The median plane dividing the body into left/right halves.

## SAGITTAL.

The plane dividing the body into unequal left and right parts and parallel to the median plane. The terms medial and lateral relate to this plane.

## CORONAL, FRONTAL.

The plane dividing the body into equal front and back parts. The terms anterior/posterior relate to this plane.

## TRANSVERSE, CROSS HORIZONTAL.

The horizontal plane divides the body into upper (cranial) and lower (caudal) parts. Cross/transverse sections are perpendicular to the long axis of the body or other structure and may or may be horizontal.

## ANATOMICAL DIRECTIONS/ POSITIONS.

### CRANIAL, SUPERIOR.

This term refers to a structure being closer to the head or higher than another structure in the body.

### CAUDAL, INFERIOR.

This term refers to a structure being closer to the feet or lower than another structure in the body.

### ANTERIOR, VENTRAL.

This term refers to a structure being more in front than another structure in the body.

### POSTERIOR, DORSAL.

This term refers to a structure being more in back than another structure in the body.

### MEDIAL.

This term refers to a structure being closer to the median plane than another structure in the body.

### LATERAL.

This term refers to a structure being further away from the median plane than another structure in the body.

### PROXIMAL.

Employed with reference to the limbs only, this term refers to a structure being closer to the median plane or root of the limb than another structure in the limb. Such a structure would ordinarily be superior to the other.

### DISTAL.

Employed with reference to the limbs only, this term refers to a structure being further away from the median plane or root of the limb than another structure in that limb. Such a structure would ordinarily be inferior to the other.

Introduction anatomical planes and sections worksheet coloring.

This interactive and interactive PowerPoint covers the concepts of body planes and positions. For positions, anatomical position, supine and prone are covered. For planes, coronal/front, cross/horizontal, sagittal and oblique are all included. Great for biology, anatomy, anatomy and physiology, LPage 2This set includes the words, circulatory system, respiratory system, skeletal system, digestive system, excretory system, integumentary system, endocrine system, muscle system, male reproduction system, female reproductive system, Reproductive pages have recently allied a poem; complete anatomy of a suitable poem activity dissecting a poem; complete anatomy of a poem activity This is included in my Mega bundle. All my resources of growing poetry. This exercise divides the different types of poems, parts of a poem, figurative language and translation. Easy to read and understand up-to-date, these units consist of a 13-part Bundle package. Part 1 is all about levels of biological organization and includes 5 lessons of about 50 minutes, and 11 work pages that have critical notes of student filling exciting practical activities, answer questions, graphic activities, page 4 to -iolless digital interactive feature with this interactive feature for Google Slides TM, which will help your students of human anatomy master life concepts molecules, including monomers, polymers, functions and structure of carbohydrates, proteins, Students wpage 5page 6Save more than 30% in this giant package that contains nineteen sets of anatomy of 24 or 30 card Covering anatomy Domino (1) anatomical orientation, (2) cells, (3) muscle system, (4) nervous system, (5) cranial nerves, (6) endocrine system, (7) blood, (8) cardiovascular system, (9) system(10) diapage 7Anatomy and physiology, perfect human body system diagrams for coloring, labeling, revision, revision, and evaluation. Includes the brain, heart and cardiovascular system, digestive system, respiratory system, urinary system, animal cells and vegetable cells. Please see individual files included in this page 8th 12-page document is a research project based on human anatomy and physiology. Students will use document to create a "year" for the anatomy academy, a school for 11 bodily systems (integral, skeletal, muscular, nervous, endocrine, cardiovascular, respiratory, digestive, excretory, 9Human anatomy lymph and physiology Structure and Function BundlePlease see the individual files included in this package for more details. Click here to accompany my store and receive the last updated. (And is incredible) Vel. The page count does not include Terms of Use and Links for Complementary Activities. Copyright © 2023 Montessori Polar Bear Unit includes three parts cards for the polar bear Anatomy. The Chemical Basis of Life, The Cellular Level of Organization, Histology, The Integumentary System, The Skeletal System, Articles, The Muscular System, Neurpage 17Video Guide Questions for Episodes 1 to 7 Crash Course Anatomy & Physiology videos. Atimo para a aula, crA©dito extra, prepara\$Aéto de testes, ISS, homebound, flipped cards de aula, material de estudo, tempo filler e mais! HÁ, Ánico\$ Ánicos for each episode. Key Answer Included Introduction 18Your students need help and more practical with terms of anatema position as proximal, distal, dorsal, ventral, anterior, inferior, deep, central, peripheral © Rich, medium, and lateral? If they do, then this set of activity charts © For you! In the first page 19 Questions of the Containment Anatomy Test © m more than 100 questions for each of the 11 body systems that you can customize for your students, for a total of over 1200 test questions! Each unit test includes automatic, true and false choice, labelling, filling in the blank space, correspondence, short response, long and complete answer 20Make super easy anatomy teaching with this highly requested anatomy course growing in package! The strata © SIOP, equipped, and differentiation strategies are incorporated and easily identified in each unit plan. The lessons are differentiated according to the style of learning, assembly and linguistic ability This is the © a worksheet to accompany the passage of the intensive course of anatomy 35:9; The Nervous System, Part 2-Action! Potential! By buying this file, you agree not to make it publicly available (on websites, etc.) or share it with any other teachers. It's the Self Anatomy Vocabulary Test © Use this test containing 260 terms of anatomy and physiology vocabulary as a practice test © comprehensive test/test results or use the pages separately as unit tests! I use this at the beginning of the year and then go back to testing quarterly to show students how much they have learned. Each page © a separate body system This is © a worksheet to accompany the passage of the intensive course of Anatomy 35:25: The Heart, Part 1-Under Pressure. By acquiring this file, you agree not to make it publicly available (on websites, etc.) or share it with any other teachers. It is intended for this practical activity of Biology/Anatomy © a major review of cellular transmission coverage: mobile: osmosis, hyper/hypo/isotonic solutions, endo/exocytosis, phago/pinocytosis, cell membranes and much more. Domino The evaluations keep the students actively involved and work well in pairs or small groups. This represents one of the 11th presentations of the PowerPoint body system that I am in the process of creating for my input human biology course. These presentations provide ideal lecture material for any class of basic physiology in the world. © Hate or mother © Hate. Just Affairs: This is © a spreadsheet to accompany accident course travel to Anatomy Pathology 35:32: Respiratory System, Part 2. The answer key too © It's included. By buying this file, you agree not to make it publicly available (on websites, etc.) or share with any other teacher. He is, © intended to class Poster of Speech Anatomy This feature © the perfect functional billboard to hang on your speech room walls. Four separate posters are included; 2 girls and 2 boys, with speech aids labelled and described. It includes PDF pr files © Separate sized 18" x 24" and PNG. Choose your favorite character and hang it on Grades:Page 21 This PowerPoint gives students a basic understanding of the anatomy language. At the end of this PowerPoint, students will be able to use correct terminology (e.g., proximal, dorsal, medial, lateral, visceral, shallow, deep) to describe the direction of body parts and regions. Students too © m will be page 22This 12 page document © a project of human anatomy based on research and physiology.
