Setting Google as your Homepage on Various Browsers To make Google your homepage, follow these steps for each browser. ###ENDARTICLETo set up Chrome browser for offline access, follow these steps: In the top-right corner of your browser window, click on your profile picture and select "Manage people." Click "Add person" and enter a name and choose an image. Sign in with the Google account you're adding. Once signed in, all settings and bookmarks will sync automatically. To switch between accounts, click your profile picture again and select a different profile. If you are unsure which account you are currently using, check which profile is listed at the top of your "Manage people" page.
