## Class 10 coordinate geometry all formulas

All formulas of coordinate geometry class 10 cbse.

MCQS On Class 10 Maths Chapter 7 - Coordinate geometry is provided here to prepare the cbse 10 Ű exam of the Multiple Choice Type (MCQ) questions about CBSE Class 10 Maths Chapter 7: Coordinate Geometry. All of these questions are provided to help students easily review important basics to prepare the Target type guestions for CBSE CLASS 10 Maths Term-I Exam 2021-2022. You will also get accurate answers for all guestions here with detailed solutions/explanations. Check under MCOs solved by Class 10 Maths Maths Chapter 7 Coordinates Geometry: 1. If the distance between the points (2, A¢ â" 2) and (A¢ â" ¬" 1, x) is 5, one of (B) (2, 6) (C) (A 4, 2) (4, 2) answer:  $\tilde{A}$  (C) Explanation: Let the coordinates of the center point be (x, y) So the coordinates are 3. The points A (9, 0), B (9, 6), C ( $\tilde{A}$ ¢  $\tilde{A}$   $\tilde$ Explanation: Here we will calculate the measure of all four sides of the quadrilateral fromed by the given points A, B, C and D. Since, AB = CD and BC = AD therefore gave points A, B, C and D are the vertices of a rectangle. 4. La distancia del punto P (2, 3) dalaxis x  $\tilde{A}$  (A)  $\tilde{A}$   $\hat{A}$   $\hat{A}$  points Q ( $\tilde{A}$  ¢  $\hat{a}$ ,  $\neg$  "6, 5) er ( $\tilde{A}$  ¢  $\hat{a}$ ,  $\neg$  "6, 5) er ( $\tilde{A}$  ¢  $\hat{a}$ ,  $\tilde{A}$ ,  $\tilde$ also the distance of the points (2, 7/3) and (5,  $\tilde{A}$ ,  $\tilde{A$  $\tilde{A}$ ,  $\tilde{A}$  $\tilde{A}$ ,  $\hat{a}$   $\hat{a}$   $\hat{A}$   $\hat{A}$ ,  $\hat{A}$ , i quadrants  $\tilde{A}$  ¢  $\tilde{A}$  ¢ «5) is the median point of the axis. Therefore, the coordinates are  $(0, \tilde{A}, \tilde{c}, \tilde{A}, \tilde{A}$ (A) Explanation: Both the M: n Report then, depending on the questions mentioned above can also be downloaded from PDF from the following link: Also check: Ã, CBSE Class 10 2021-2022: to help the s Locks to review their class 10 mathematics program so that you can remember all the topics and important resources. These resources will bring you the extract of the entire program so that you can remember all the topics and important concepts in a short time before the exam. The links to the article are provided: cbse class 10 maths case studies for all chapters (mcq type) cbse class 10 maths questions and important answers cbse class 10 maths solved year previous questions cbse class 10th maths chapter 9 3 Å «CoordinaÂ" Geometry is provided here to help students prepare for the upcoming math exam. MCQs from class 9 maths CBSE Chapter 3: Geometry 1. If the coordinates of a point are (0, -4), then it lies in: a) X axis b) Y axis c) At the origin d) Between the x axis and the y axis at 4 units away from the origin. 2. If the of a point (3, 0), then it is located in: a) axis x b) axis y c) to the origin d) between the x and axis y axis reply: (a) explanation: since © X = 3 EY = 0, the point are (-3.4), then it is located in: a) first quadrant b) second quadrant c) third quadrant d) fourth dial response: (b) explanation: since x = -3 EY = 4, then if we trace the point on a plane, it is in the second quadrant at is located in: a) first quadrant to third quadrant at is located in the third quadrant at is located in: a) first quadrant at it is located in: a Cartesian plane which determines the position of a point is called: a) Origin b) axis x c) axis y d) reply quadrants c) 7. The section formed by the horizontal and vertical lines that determine the position of the point in a Cartesian plan is called: a) origin b) x c) axis y d) reply dials (d) 8. The intersection point of the horizontal and vertical lines that determine the position of the point in a Cartesian plane is called: a) origination b) x axis) Y axis) Answer quadrants (A) 9. Points (1,2), (-2, -3), (2, -3); a) first quadrant b) they are not in the same quadrant c) third quadrant d) fourth dial response b) 10. If the x coordinate of a point is zero, then the point is located on: a) first quadrant b) second Quadrant c) third quadrant d) fourth dial response (d) 12.ã, the point (0, «5) is located: a) on the XB axis) on the YC axis) in the first quadrant d) none of the previous answers (b) 13. $\tilde{a}$ , the  $^{\text{m}}$  sorting all points on x axis is: a) 0 b) 1 c)  $\hat{A}$  «1 d) any natural number response (a) 14. $\tilde{a}$ , points (1, -2), (1, - 3), (-4, 5) (0, 0), (3, -3) a) Lie in Quadrant II B) Lie in Quadrant II C) Lie in Quadrant IV D) Did not find itself in the same answer (D) 15. $\tilde{a}$ , if the X coordinate of a point is zero, then this point is: a) in Quadrant II b) in the dial i c) on the XD axis) on the Y-axis reply (D) 16 .Ã, if the Distanz is A perpendicular foot is on the negative direction of the x axis, then the point p has: a) coordinate y = 7 or only 7 b) coordinated y = 7 only c) coordinate y = 7 sole d)  $\tilde{a}$ , x-coordinate =  $\hat{A}$  «7 reply (a) 17. $\tilde{a}$ , in tracing p (3, 8), q (7, 5), r (3, 8) and T (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the third quadrant are: a) p and t b) q and r (7, 9) are traced on the graphic card, then the points in the graphic card, then the points in the graphic card, then the graphic card, the graphic car in: a) I and II quadrants b) I and IV c) only quadrant d) II only Answer (b) 20. The point whose order is 8 and lies on y-axes: a) (0, 8) b) (8, 0) c) (5, 8) d) | (a) 21. Coordinates of b (â3, â4) Answer (b) 23. The distance of the points (5, 0) and (â3, 0) from the x-axis is: a) â3 b) 5 c) 0 d) 2 Answer (c) 24. The perpendicular distance of a point P (5, 8) from the y axis is: a) 5 b) 8 c) 3 d) 13 Answer (a) 25. One point (x 2 What is the value of x? a) (â5, â7) b) (â5, 7) c) (5, â7) d) (5, 7) Answer (d) MCQ Questions for Class 9 math with answers
