Example file with which to exercise (ZIP, 24.6 MB) Follow the steps below to correctly understand how to export your InDesign file. This will make it much easier to import on Lucidpress. It is advisable to follow the steps below to meet all the elements needed to have a successful import. To pack the file in INDESIGN instead of saving the file in INDESIGN as .indd, you need to pack the file to get access to images and fonts. Open your file in InDesign. Then click File> Package. Save the file if you have not saved the file, save it. You can ignore the printing instructions à € "Click on> continue.à € »Complete the package hold the document and click à à à à » Package.à »Make sure you include IDML is selected.à, displays the contents of the folder Now you will have a folder with: document fonts, links, text, .idml, .indd and .pdf. Pictures of Lucidpress Format supports PNG, JPG and SVG files (even if SVG files should be used sparingly because they are large files). For Photoshop (.psd) files, Lucidpress can automatically compress them in JPG. If you do not want to reduce the resolution of these files, export the image as a PNG to Photoshop. Convert any other type of file like PNG or JPG. Importing a .indd file to Lucidpress Follow these steps to import the InDesign file to Lucidpress. You can follow us by practicing with us. Click the InDesign Import Login button in Lucidpress. At the center of the home screen, click à à «InDesign Import.à €» Import the .idml file Click à à «ImportA», select the .IDML version of the file from the package folder, then click à «Open.à »Upload the missing characters the character family will be listed in bold. The different faces of characters such as regular, bold and italics are shown below the character family. Each character will have to be loaded by clicking on the «Load.à» Buttrer your characters from your compressed file folder. Note: We only support the types of OTF and TTF font files. We will immerse ourselves deeper in fonts in the next section. Upload missing images Upload your images from the «Links.à» folder Remember that Lucidpress does not support EPS images (at least until the Post script updates their services and makes it more secure). This means that EPS images from the InDesign file will not be loaded. Convert your EPS files to PNG or JPG and then add them manually at a later time. Note: If you want to manually replace PSP files (to preserve special quality or formatting), don't upload them. Convert PSP files to PNG or JPG and add them manually even later.
