## How to completely uninstall apps on android

How to uninstall apps completely on android. How to uninstall apps that won't uninstall android. How to uninstall preinstalled apps android.

Android has been around for more than a year, and at that moment the developers whiped some large apps. Whether you are a new Android owner or a pro looking for new tools, these 10 fantastic and free apps belong to your Arsenal.Photo of Lwallenstein. To jump immediately above the apps that are so common, universal, and well replicated on the iPhone or other mobile platforms that a user with a need probably we can do - Facebook, Yelp, Evernote, remembers milk and endless twitter clients, Widget and app. We also skipped on Google's ordered apps, like Google Voice, navigation and glasses, which are (or will) included the standard on new Android phones. Instead, we are aiming to shine a small light on apps that can easily offer excellent functionality for those who download them.Update: I moved taskiller for free up to a lower ranking, and modify its entry description a little, after some more Searches, off from some comments and emails Andro-savvy.10. Layarin Some ways, this is a vote for the potential of layar as much as the practical application. Walking through your phone and see Wikipedia's subjects, apartments for sale and what Twitter users have delighted through your phone is a rather accurate thing, and potentially useful when you're looking for things to do in a new city. But as Layar continues to add new levels, and how the camera and mobile processing power continue to improve, Layar could become much more interesting than already. One thing worth remembering is that if you don't like the view of the 3D camera, or as the appearance of yourself while you use it, Layar can only show the points of interest on a Google type map. Anyway that you use it, it's an intriguing aspect to what is happening around the corner. (Original post) iPhone / Android: Layar, the mobile app that overlap the data signals on what the phone video camera sees, Å € Å,~ | Connect more. Listening to the last update, we couldn't really call to listen to a king among the podcast apps ... had some Irkensome bugs, one of them is the loss of episodes and sometimes subscriptions. Now, however, your Google app does a great job not only to find audio content, but Export your subscriptions to manage in Google Reader, guaranteeing a full feed backup and easier recovery of past episodes you want to go back And listen. If you need a fine fine grain podcast control, Acast test, but listen to most. (Original post) The Android market continues to grow, the new phones are apparently coming every bearer, but finding the most8 laws. AnyCutyou You can drop a lot of things ordered on your home android home screen, but you can't get a click with one click all in the settings and in the extras of your phone. Anycut does not have an excellent interface, and it may require some process and error before arriving exactly what you are looking for. Quite soon, however, you will have access to the deeper guts of your settings, then switch forward and turning off and turn off, enabling location services and other tricks are easy to extract. (Original post) Click to see you have already seen our practical review of the new Google mobile operating system, Å € Å,~ | Connect more. SecretstHERE is not the synchronization of the browser on AndroidÅ € Å,~ "still (C'Mon, Mozilla, salts on that Firefox Mobile!). Meanwhile, there are secrets, a well-safe caveau, compatible with compatibility compatible with Password for all your passwords. It is not so difficult to export your passwords from the desktop or laptop to your SD card, and with the search to Full-Text finally implemented, the secrets are much more For those moments oh-shoot-what's-that-username-again. (Original post) Only Android: Today Google has announced the release of the secrets, a secure password manager for AndroidÅ € Å,~ | Connect. FreeThe As Desside tariller at Android multi-tasking is that at times, some apps can become unexpectedly become magni of memory or bandwidth or bring the phone with them when they lock. Few apps provide a direct and easy "chit" option, however, and sometimes you can't get to the To close it. Enter taskiller, a free app murder utility that works from its standard icon, or as a series of numerous widgets you can add to the home screen to save the system with a single click. The free version serves advertisements and lacks some advanced features, but generally serves the needs of anyone who tires you to need to actually reset the phone just to clarify space for, know, phone calls and such. Note: This app must be used as more than a last resort than the regular maintenance tool, killing processes and Willy-Nilly apps can disable alarms, kill background synchronization and have other non-intentional consequences.3. Slidescreenyou uses your Android smartphone differently from your desktop computer. Don't work with files and shortcuts, so that check-in on data flows that interests you - E-mail, text messages, Facebook and Twitter, chats and the like. Slidescreen replaces, or simply increasing, if you wish, the main phone screen, creating line after the message line and feed. Slide the central information bar upwards and down to look more or less of your items, scroll right to dismiss items like beds and finish having all your data on your hand at once. Slidescreen also replaces the standard application tray, offering 8 slots to put your apps most frequently accessible and tuck up all the others in a rolling bridge below. It's a total makeover for your phone, in other words - one that could simply make you fall in love with the concept of mobile data. (Original post) Android: The default home screen in Android is fine and for the most functional. Slidescreen, atÅ € Å,~ | Connect4. Shoperokay, at the beginning we were rather skeptical of the application of Google's Shopper, since it only seemed a mashup of his Google glasses and Google's smart-smart apps like Shopsavvy. Then we actually used the shopper, and we were amazed both from what is accurately considered both barcodes and simple hedging shots, and how much it worked very quickly. It turns out, according to a developer who appeared in this week in Google, shopper is actually loading the image data on Google servers as it captures and decodes the barcode on the phone. The speed for the speed sake is beautiful, of course, but it's nice enough not to have to stand in front of a display of a book for a whole two minutes, waving the phone around a group of books you are trying to do the competitive price. The buyer answers the question "I can buy this cheapest", and responds quickly.Android: Google has already got got glasses for visual search and the Google Shopper's mobile site can be run ... Read more. PDANETPDANET is the simplest way to use your phone's net mobile connection as an Internet Makershift access point, for those hard-up situations when you just need to get somehow online, anyway. The free version always offers basic Internet access, but limits secure site connections after a trial period. The paid version is not cheap (\$ 30), but it is the simplest of the three ways we know how to tell an Android phone. For the cost of nothing, we will take the basic website of the website - because, hey, I can't reach Gmail on your phone if you really need it? (Original post) There are three ways to rent your Android phone and get the Sweet Internet love also where there is ... Read more. Wavesecurethis is only free until March 31st, then make sure you jump if you think there is also a remote You want Killer security tools at your disposal. Wavesecure Not only backs up your contacts, SMS messages, photos and videos and other files on the developer cloud for the next restore if your phone is lost, but can block a phone when it blocks it for a while, identifies a phone With the triangulation of the GPS or text message (seriously), and, as a final option, pull out a total and complete remote cancellation if it takes everything is lost. Powerful tranquility, especially for the price. (Original post) Android / Windows Mobile / Symbian: If your phone drops or is raised, wavesecure, currently ... leader more. Astro File ManagerThis is one of those app app Hope has a bit of attention, if only to be purchased from Google or otherwise integrated into the base phone software. Astro File Manager does a great job to allow you to navigate the files on the SD card and the internal memory accessible, surely, but it also has your own integrated killer task, backing up applications, can send files as e-mail attachments (not everything Easy or intuitive from the mail client, for some reason) and much more. It is the Leatherman of Android utilities and a must-have on any serious Geek phone. To each of them, obviously, but we would like to hear which Android apps consider crucial to your phone in the comments. We tend to free, but if you have found a cheap app that is worth a few dollars, our loving Android readers and developers, they would probably be happy for the referral. Here at Android Central, we are always telling you the latest and larger apps. Let us also examine some new apps every week. But maybe you tried an app and you just don't like it. You want it from a phone, but you can't understand how. No worries, follow the underlying steps and you will be set up! Start the Hit Market €> Download menu if you start on the Apps for the home screen are arranged from a last update. Then scroll through the list to find the app you don't want anything to do with and click at the bottom right, there is a 'uninstall' button. Click on it and a window will be displayed by asking you to confirm your choice. Press "OK" and you're done so simple. For users who want a little more information, you can access the menu-> Settings> Applications> Manage applications. After clicking on the app, you will see a screen full of data on the space used and permissions. Once again, there is a convenient "uninstall" button on this screen. For those on Frojo, you can also move the apps to the SD card from here. There are so many apps outside for Android devices, many of them free, which you can't help install a group of them. However, you may find that you don't like some of them, or you're starting to stay out of the room on your device. Update: The Android interface has evolved tremendously since this article was originally published. Here is an updated guide on how to uninstall, delete and disable Android apps from your smartphone or tablet. Related: How to uninstall Android app from smartphone or tablet apps uninstalling app is easy on Android devices. We will show you three simple methods to uninstall apps in Android. Uninstall an application using the DRAWER / APP app tray to uninstall an application using the app drawer or the app tray, touch the start button in the Dock apps at the bottom of the screen (in vertical mode) or on the right side of the screen (in horizontal mode). Scroll down until the screen is reached showing the app you want to uninstall. Touch and hold the icon for the app and then drag it into the basket icon on the main screen. A confirmation dialog is displayed by asking if you want to uninstall the app. Tap ok. Uninstalling an application using Application Manager You can also uninstall an app in the settings using the Property screen for the App in the Applications Manager. To do what, scroll down in the upper right corner of the navigation bar / status and tap Settings. Note: If you have a Samsung Galaxy S Series device or a Galaxy tablet, there is a slightly different method to access the properties of an app. We discuss access to this screen in our article on Force Stopping Apps in Android. On the Settings screen, tap App with the A list of download apps is displayed. You can also view different list lists depending on where the app is installed or in which state is currently incoming, as the apps installed on the SD card (if the device has one), a list of apps in Execution and a list of all apps. Find the app you want to uninstall in the list and touches. The Info App screen appears. Touch the uninstall button. A confirmation dialog is displayed by asking if you want to uninstall the app. Tap ok. The app is removed from the list. from the list. An application that uses Google Play Store The Google Play Store knows which app you purchased (return or free) and if they are installed or not. To uninstall an app, you can go to the Google Play Store page for the app and tap the Uninstall button. A confirmation dialog is displayed by asking if you want to uninstall the app. Tap ok. Once the app is uninstalled in the Play Store, it is returned to the app page and the installation button is available. Tap the Home button to return to the main screen. screen.
