Procrastinating's life any easier. Casual smartphone games are a great way to waste time, whether it is a couple of minutes or a couple of hours you have to spend. They require little to no dedication, they're easy to pick up and play, and many of them can be enjoyed for free. That's why many of the most popular games on mobile belong to this category. And below we have 7 casual Android games we think you should try. After you're done studying for that test, of course. They're all fun and they're all free, so there's nothing stopping you from giving them all a try.Which of these casual Android games you like best? Any great games we should have included? Let us know in the comments! Looking for a new game to play on your Android smartphone? Don't know which ones are worth downloading and spending your money on? I've got your back on this one. As PCWorld's Android editor (and an inveterate gamer), I'm always on the lookout for entertaining Android games. If you have a game you love, be sure to share it in the Comments below.One of the more unusual sims out there, Game Dev Story puts you in charge of your own game company. You'll hire designers, artists, and writers in an effort to win the coveted "Game of the Year" award. The first time I opened this game to take it for a test drive, I ended up playing it for 3 hours straight. Better have that charger ready: Once you start, you won't want to put it down.Kairosoft's Game Dev Story | Price: \$2.97Who knew that sending rabbits in rockets hurtling through space would make a great premise for a game? In Rocket Bunnies, you are a bunny in a rocket (hence the title) that flies from planet to planet attempting to rescue your long-eared friends. Levels have time limits, so you have to move quickly to liberate the other lagomorphs. It's simple, strange, and pretty darn fun.Defiant Development's Rocket Bunnies | Price: FreeSure it may be a tie-in to Rio, the animated movie, but Angry Birds Rio is a much more polished and challenging game than the original Angry Birds. Though you won't be crushing any green piggies in this version, Angry Birds Rio has you freeing feathered friends that a gang of monkeys has captured. If you're an Angry Birds fan, you owe it to yourself to check this version out (just avoid the movie if you can).Rovio's Angry Birds Rio | Price: FreeEasily one of the most popular mobile games on both iOS and Android, Cut the Rope is a crafty puzzle game in which you attempt to feed candy to a little green monster named Om Nom. The game starts off slow and easy (you'll only need to cut one or two ropes to feed Om Nom), but it quickly becomes a test of your wits and reflexes as spiders and spikes try to stop you from getting the goodies to your little friend. Do you have what it takes to cut the rope?ZeptoLab's Cut The Rope | Price: \$0.99One of the strangest and greatest tower defense games of all time, Plants vs. Zombies has finally shambled onto Android (albeit through the Amazon App Store). In PvZ, you must defend your lawn, pool, and roof from zombie hordes by means of various plants. Each plant has strengths and weaknesses, and you'll need to master all of them to survive each wave of the undead. The game is a pretty big download, so you should connect to a Wi-Fi network before making the transfer. Once you have it on your phone, though, those zombies won't know what's hit them.Popcap's Plants vs. Zombies | Price: \$2.99You rarely see a multiplayer action game that work as well as this one does on a mobile device. Gun Bros is a twin-stick shooter with some RPG characteristics. As you defeat wave after wave of enemies, you gain money (which you can spend on better equipment) and experience (which will enable you to take your character up a level). The game does take a bit of power to run so, if you have an older Android device, you should probably skip this one. Even for people who aren't big action-game fans, at the low price of free, Gun Bros is definitely worth getting.Glu Mobile's Gun Bros | Price: FreeThousands of levels, easy-to-learn controls, and addictive gameplay--all for free. Bubble Blast 2 is easily my favorite Android game of all time. The point of the game is to pop all the bubbles on screen within a set number of pokes. Not all bubbles will go quietly however, as some will require two or more pokes before they pop. With more than 6000 levels, this game will definitely have you coming back for more.Magma Mobile's Bubble Blast 2 | Price: FreeWith colorful 8-bit-style graphics, Radiant is a great-looking game. You'll spend most of your playing time dodging asteroids and blowing up enemies. Enemies will occasionally drop money, which you can use to upgrade your various weapons. At the end of each section, you'll encounter a massive boss that you must defeat before moving up to the next set of levels. Radiant is loads of fun, and Hexage has also released an HD version that works on both Android phones and tablets.Hexage's Radiant | Price: \$2.36 "Hard" is an understatement when it comes to Meganoid. The game can be downright brutal at times and, once you beat it, you unlock an even harder set of levels. Meganoid plays very much the way Mega Man does. You have to get from point A to point B without getting hit by any of the dozens of obstacles or enemies that will kill you with a single touch. Players who like challenging games should find that Meganoid satisfies their masochistic desires nicely. Just don't expect to make it through the game without dying at least once. OrangePixel's Meganoid | Price: Free The ultimate sim for baseball fans, 9 Innings: Pro Baseball 2011 lets you manage your own baseball team. You can buy or trade players (each with real-life stats), and build a baseball dream team. The better you play, the more money you'll get to spend on upgrading your team's stats. With baseball season coming to a close, 9 Innings: Pro Baseball can help fill the looming void until next spring.Com2uS' 9 Innings: Pro Baseball 2011 | Price: Free U.K. carrier Vodafone today announced the launch of its Vodafone 360 Shop for Android, which is geared toward helping developers design standard widgets, widgets for Opera Mini and direct-to-carrier billing options. It's yet another option outside the Android Market, which has seen explosive growth but continues to experience growing pains, including slowdowns, and, over the past week or so, disappearing apps and mis-reported download numbers. Check out Vodafone's release after the break. [Vodafone]VODAFONE LAUNCHES 360 SHOP FOR ANDROIDDevelopers able to create and distribute apps tailored to Android handsetsTuesday 15th June, 2010. Vodafone today announced that it is to extend thereach of the Vodafone 360 services with the launch of a 360 Shop for Android.The announcement highlights Vodafone's commitment to bringing the 360 Shopto popular, market-leading handsets and, in so doing, offering developers alightly attractive native or cross-platform proposition.The 360 Shop for Android has been designed specifically to ensure thatcustomers can easily search for and browse the applications most suited totheir needs and interests. This is achieved through a sophisticatedpersonalised recommendations tool and dynamically changing promotional areassuch as best rated, top downloads, categories and filtered lists. Featurecontent promotions will be run by local market editorial experts to furthershowcase locally relevant apps. All paid-for content is charged to thecustomer through operator billing, with funds regularly transferred into thedeveloper's bank account, making it simple for developers to keep track ofrevenue.Through the 360 Shop on Android, Vodafone is giving apps developers theability to publish either JIL or native Android apps in the 360 Shop.Developers can also take advantage of existing Vodafone features such asclear pricing, a transparent review process and in-depth reporting. "Developers want to know that their app will be seen by consumers, and the 360 Shop on Android has been designed to maximise opportunities for contentpromotion," said Lee Epting, Director of Content Services at VodafoneGroup. "Initial data is showing that up to a third of the catalogue getsexposed in a single day. This is a market-leading approach which will allowboth customers and developers to get great value out of the 360 Shop."Tailored for the Android operating system and directly accessible from thehandset home screen, the 360 Shop on Android will launch this summer on theHTC Wildfire and Sony Ericsson Xperia X10 Mini Pro. The 360 Shop is a singledestination for all digital content, integrating music, video, ringtones andapps, ensuring it will continue to serve the millions of existing Vodafonemobile! customers. Furthermore, the handsets will come with 360 Music servicesembedded and Vodafone People soon available as a download.To date, over 8,500 apps have been published to the 360 Shop. Eight Europeanmarkets range over 100 different handsets capable of accessing the Vodafone360 services. With further handsets due to launch throughout the year withthe 360 Shop pre-loaded, Vodafone 360 will continue to provide the developercommunity with greater access to more customers. Playing games on your Android phone is fun, but things can get a little cramped on those small screens. That's when it's time to whip out your handy-dandy tablet and get a more immersive experience going. Here are some of our favorite games to play on a nice, big slate that provides plenty of room to tap and swipe.Featuring one of the more seemingly useless creatures of the franchise, Pokemon: Magikarp Jump is a cute Pokemon Go spin-off that is anything but derivative. This game revolves around feeding and training your Magikarp to jump as well as keeping it safe from predatory Pidgootos. Controlling your fishy friend involves tapping the screen to perform various actions. The graphics are bright and adorable, which fits with the game's more passive nature. Complete with tons of gaming in-jokes, Pokemon: Magikarp Jump is a delightful treasure. An interesting take on endless-runner games, Flipping Legend is a fun, fast-paced game with retro-style graphics. You control your character's forward movement by tapping the left or right buttons; the twist is that you can move forward only diagonally, not vertically. This neat shift forces you to think differently when avoiding obstacles and taking down enemies. You can also flip backward in a straight line, but be careful, as that drains your special meter. You'll race against your steadily declining health meter to reach the end of each course. The game's music is fantastic and complements the 16-bit feel of the visuals. Making the leap to mobile platforms, Jaipur is a neat card game that revolves around trading resources. Set in ancient India, the game has you collect, trade and sell different goods in an effort to get the most points. The rules are simple to grasp, and once you have a feel of the gameplay, rounds go by very smoothly. The graphics are lovely, and the background music and sound effects evoke the feeling of a bustling marketplace. Plus, each match is relatively fast; you can play an entire set against an opponent in less than 30 minutes. The mobile version of the long-anticipated sequel Injustice 2 is finally out! Choose from among your favorite DC heroes and villains and duke it out on several beautifully rendered stages. The brawling mechanics are simple to grasp, and attacks can be done via tapping or swiping your screen. When your character's meter is full, you can unleash a devastating super move. The characters move very smoothly and the cutscenes are stunning and full of minor graphic details. Injustice 2 also offers various single-player and multiplayer gameplay modes, and lets you customize your characters to better their strengths and defenses. Whether you're a hard-core comics nerd or merely a fighting game enthusiast, Injustice 2 is a must-get. Produced by a national museum, Father and Son is quiet and fun point-and-click adventure game. You play as Michael, who is researching his archaeological father's past. During the game, you'll travel to different points in time and make choices that will affect the ending. The touch screen is used to move, interact with objects and decide actions. The story line is intriguing, and the graphics are rich and reminiscent of museum-quality fine art. If you're looking for a unique and interactive adventure, add the game to your library. Everyone's favorite mustachioed plumber is back for adventure in this addictive side-scrolling, endless runner. In this game, Mario runs from left to right automatically and you jump, double jump, or jump and spin kick by tapping the screen. The game can be straightforward and simple, with you barreling through each level, or you can challenge yourself by collecting five pink coins in each level. However, there is a small catch. While the free version offers you a limited number of levels, you must pay \$9.99 to can access all the worlds. The sequel to Drop Wizard, Drop Wizard Tower is a fun, free 2D game with a great early '90s-retro vibe. Your character is a wizard who's trying to advance up a tower by killing various enemies by first stunning them with a star and then running into them after they're dazed. The graphics and the music evoke a feeling of old-school platformers such as Alex Kidd, and the gameplay offers just enough of a challenge to keep you on your toes. Name a fun game-show adaptation that's sure to keep you occupied. If you guessed Family Feud Live, you're a winner. Although the game is bereft of Steve Harvey and his ad-libbed quips, Family Feud Live offers three addictive gaming modes and lets you play against your friends or strangers. The game offers classic, tournament and fast-money modes. Classic mode plays just like the show, with three rounds and escalating point totals. Tournament mode is similar but requires you to defeat three opponents. Fast money is similar to the final round, in which you have to guess the top answers to five questions. Set in a lethal circus, Penarium is a bizarre and fun 2D-arena platformer in which your only goal is to survive on onslaught of hazards for a mad audience. The game casts you as hapless innocent Willy who is tasked with collecting barrels and coins. Although the game starts off with easy hazards, after every five barrels, the dangers get harder and harder. Before you know it, you'll be dodging ice spikes, bees and heat-seeking missiles. You use your touch screen to control Willy's movements and guide him to safety. The challenge is as much a part of the charm as are the cool throwback graphics and the silly, circus-like music. Arkanoïd vs. Space Invaders is a fun crossover puzzle game developed by Square Enix. Much of the gameplay is based around Arkanoïd, the classic game in which you use a paddle to deflect aliens' shots back to destroy either their spaceships or bricks. In typical Square Enix fashion, the game has an in-depth story and a good justification as to why aliens are bobbing and weaving through bricks trying to colonize peaceful planets, but you can skip this story if you're not into it. The biggest selling point is that there are no unnecessary in-app purchases, which is a refreshing change of pace when buying a fully realized mobile game. Perfect for the retro gamer on the go, Sega Forever is an amazing app that allows you to play several games originally released on Sega consoles, from mega-hits such as Sonic the Hedgehog to the critically acclaimed but obscure Comix Zone. The emulation on these games is pitch-perfect, the touch-screen controls work like a charm, and with the addition of cloud saves, you won't have to worry about losing your progress. Although the library is small, more games will be added in the near future, turning this app into a Netflix for retro Sega games. Although Run or Die gives away most of its premise in its title, this side-scrolling, endless runner has a few extra tricks up its sleeve. The game contains 170 detailed levels with day-and-night-cycle variations. In addition to running, you'll also have to jump, slide and use various abilities in order to stay alive. The touch-screen controls are very responsive, which is perfect since you'll have to make split-second decisions to avoid dying. Along with a standard level, Run or Die also contains a very helpful training mode, an endless mode and a challenge mode, in which you can compare your times to players around the world. This underground, indie fighting-game hit has finally made the leap from consoles to the small screen. Created as a love letter to fans of the Capcom Versus series, Skullgirls is a fun fighter with the distinction of having a majority-female roster. Instead of a six-button and joystick structure (which is not possible to comfortably replicate on a touch screen), Skullgirls uses a simplified control scheme in which swipes and taps are used to execute attacks. The game's graphics are beautiful and complement the jazzy and jaunty music to evoke an old-school Hollywood glamor feel. Whether you're a fighting game nerd or just a sucker for cartoonish violence, you'll get a major kick out of Skullgirls. The first thing to notice about Old Man's Journey is the beautiful art, which gives the game a distinctive look and feel. In this gorgeous mobile game, your goal is to help an old man on a journey by using your touchscreen to manipulate his surroundings. For example, you can enlarge a hill to help the man get to higher ground or tap sheep to move them aside so your character can pass. Instead of relying on words, the game tells a rich story using actions and music for a more immersive experience. If you're a fan of NASCAR and stock car racing, NASCAR Heat Mobile is a great addition to your Android tablet. Thegameplay involves tapping or tilting your phone in order to steer. The controls don't feel too stiff, and the maneuvering is pretty smooth. You can generate resources by constructing a Fan Zone and use said resources to enhance your car or hire drivers who have their own souped-up vehicles. Although winning every race is important, NASCAR Heat Mobile also has extra objectives such as maintaining a high average lap speed. Overall, the gorgeous graphics and inspired tracks will keep you doing one more lap.
