ANSWER

1. 30 MARCH 1944

2.0903775115

3. NORTHERN

4. TRAIN

4. What is admirable about Dr. Patil's definition of a data scientist is that it limits data science to activities involving machine learning.

- False.

- Q True

✓ Correct

Correct. What is admirable about his definition is that it does not limit data science to activities involving machine learning.

- S. According to the reading, the characteristics exhibited by the best data scientists are those who are curious, ask good questions, and are O.K. dealing with unstructured situations. 1/1 point

- True.

- False.

Cost of equity calculation

- Risk free Rate = 2.5%
- What if you had been asked to compute cost of equity in Baht?
- Beta

Business	Unlevered beta	Value	Weights
Steel	1.2	\$1,200	80%
Chemicals	0.9	\$300	20%
Company	1.14	\$1,500	
- Levered Beta = $1.14 \times (1 + (1-t)(0)) = 1.14$
- ERP

Country	Value	Weight	ERP
US	\$1,000	66.67%	5.00%
Thailand	\$500	33.33%	7.25%
Company			5.7500%
- Cost of Equity = $2.5\% + 1.14 \times (5.75\%) = 9.055\%$

5

Coursera cryptography final exam answers.

The verification is carried out naturally. Suppose (E2, D2) is a symmetrical encryption that uses 128-bit keys to encrypt 128-bit messages. Suppose that RSA was defined in Module 6 instead of a RSA N compound. To sign the message M using the SK Private Key, choose a uniform key k for a message authentication code and then SENDK, sign. Remember that RSA Trapdoor permutation is defined in the group Z_n^* where n is a product of two large primes. Its explanation of response punctuation given a K key in k is difficult to find different messages M_0 and M_1 in such a way that $S(K, M_0) = S(K, M_1)$. The parties agree on the following protocol that is executed in a GROUP G of first order Q with Generator G_i for $i = 1, \dots, N$. Party A chooses a random AI in $\{1, \dots, n - 1\}$, and send it to Party B. The amount $X_A, X_B \in G$. The attacker can not create an encryption c such as $D(K, c) = K$ & X . Correct 0.25 The declaration is incorrect. (E2, D2) is deterministic and It does not use not taxes. Then, encrypt each block independently using the gamal encryption. To encrypt a G message using the K key, exit the encryption K. What is the encryption of $[2M \bmod N]^2$? Q10 DIGLE that has "access Oracle to a code of code that, given an M message, adds an unknown 8 bytes, applies the PKCS # 7 fill, and then encrypts the result using AES-128 in ECB mode with an unknown key. That is, the adversary does not learn anything about m dix (K, M). EnvAe the 15-byte message "ABCDEFGHijklmnO" and the 16-byte message "ABCDEFghijklmnO", and check if the first block of the resulting encrypted text are equal. (here we treat plaintexts as integers) Correct 0.25 sA, otherwise the system will have no ciphertext integrity. Correct 0.25 The statement³ incorrect: a random string in the ciphertext space is likely to result in Aé A ÁV so an attacker can choose a random ciphertext. The explanation³ the response score (E1,³D1) can be soundly secure under a chosen plain text attack. Of the following, what is the best approach?To encrypt an M file, hack the file to a short value h = H(M), and then encrypt h using El Gamal encryption. To encrypt an M file break it into a sequence of M₁, M₂, Ao the following properties are impl₁ed in the definition³ MAC security estAndar? (k). Mac (M') on any M' of your choice n. This is not safe because given the message/signature pair (k, Sign, (k)) an attacker can easily forge the seA±al,(K) on a k' key of your choice³ n,07) Let G be a group, and consider the following private key encryption scheme: With G message space: The shared key is a uniform k = G. The public key is (N,e) and the private key is (N,d) where d is the inverse of e in Z_N (N)Aé A Á. Correct 0.25 Yes, for example (E1,D1) can be a secure stream encryption. To decrypt an encrypted text c E G using the key k, send the message k-1.c. What is the case with this scheme? The scheme is CCA-secure. The scheme is elpmis elpmis odarfic odnhus odilbAh odarfic le eredisoC)7P,otercses etnemacrefrep on orep, elbiugnitdsu etnemlanocatupmoc se ameuqse IE,eruces-ACC on orep, ,eruces-APC se ameuqse
