Billboard Hot 100 is published weekly by Billboard magazine. It is a list of 100 More popular in the US Billboard also tracks whether a song is greater or less in the lists every week, its maximum position and the total weeks on the list. Often, the artist with the first-selling album is different from the artist with the first-selling single on the Billboard Hot 100. Hot 200 albums are released every Friday, which is also the global release date for most new albums. To track sales and streaming, the Hot 200 Albums Chart program is delayed a few days to cover a full week of sales. For example, if an album graphics on January 27, the total number of listeners will be from the follow-up week of January 12-18. Sales and Streaming While record sales have been decreasing in recent years, the use of streaming services is increasing. In recent years, audio and video-on-demand streaming services have set high records for streams. Music consumption has gone up, but music sales have gone down. Radio: The world's largest AM/FM radio is iHeartRadio. Radio is still the most popular way to consume music. For an artist to make the Top 40, he needs to have high radio works. Nielsen tracks radio stations across the country and measures which songs are playing. This info helps Billboard tracks the best songs in the country.
