Asus transformer prime tF201 price. Tablet asus transformer tF201. Asus transformer prime tF201 specs. Tablet asus transformer prime tF201.

This page details the status of postmarketOS ports to various devices. If you are porting a device, please create a device page and describe the progress of the port. After the page is created, data about your device will appear on this page automatically. If you want to filter the list of devices based on one or multiple properties, use Special:Drilldown/Devices page. Note: See the Status Legend for an explanation of status codes (e.g., N, P, Y, -). Main These are the most supported devices, maintained by at least 2 people and have the functions you expect from the device running its normal OS, such as calling on a phone, working audio, and a functional UI. Device Codename Architecture Release year Chipset CPU GPU FEE Camera GPS Mobile Data SMS Calls USB-OTG NFC PINE64 PinePhone pine64-pinephone aarch64 2019 Allwinner A64 4x 1152 MHz Cortex-A53 Mali-400 MP2 Y Y Y Y Y Y Y - Purism Librem 5 purism-librem5 aarch64 2019 NXP i.MX8MQ 4x 1.5 GHz Cortex-A53 Vivante GC7000Lite Y Y Y Y Y Y Y - QEMU aarch64 qemu-aarch64 aarch64 2003 QEMU ARM Virtual Machine QEMU ARM Cortex-A57 Virgil 3D Y - - - - - QEMU amd64 qemu-amd64 x86_64 2003 QEMU Standard PC QEMU Virtual Virgil 3D Y - - - - - Community Devices that have had a lot of work put into them, where regressions are actively fixed, and the port is overall in a pretty good shape. Status Legend Code Meaning Y Yes, fully implemented P Partially implemented N Not working yet Untested - Not applicable - device does not have feature Columns Column Meaning FDE Full disk encryption and unlocking with osh-sdl. Camera Taking photos and videos works. GPS The Global Positioning System sensor works. Mobile Data Connecting to the Internet via cellular network. SMS Sending and receiving short messages works as intended. Calls Talking to other people over the cellular network. Mainline* Runs a (Close to) Mainline kernel, not an Android downstream kernel. Testing All other device ports, including new ones. Maintainers can create merge requests to move devices to community if requirements are met on the Device categorization page. A more detailed view with a full status matrix of these devices can be found on the All devices page.
