This program is the latest in a long line of successful digital photo software. It contains the most recent digital technology, image processing and many new features. We firmly believe that Zoner Photo Studio will become an irreplaceable assistant for you in your photography work. We wish you much success in your endeavors with digital photography, and much more! Minimum System Requirements Operating System: Microsoft Windows 7/8 / 8.1 / 10 (32 or 64 bit) Processor: Intel or AMD CPU with SSE2 support Memory: 2 GB of RAM HDD: 350 MB free disk space Resolution: or higher Requirements ZONER software system for advanced users Work with large photographs and panoramas has especially large memory requirements. For these situations, it is recommended that at least 4 GB of RAM and a 64-bit version of Windows. For the comfortable work in these situations, it may also want a relatively high-performance processor. Zoner Photo Studio can take advantage of multi-core processors if it detects more cores, it automatically divides tasks and calculations. Last but not least, we recommend a higher resolution monitor to minimum. Warning Unlike some photo managers that work through a database of pictures rather than the same image files, Zoner Photo Studio works directly with files on your computer and on any device attached to it. This means you can start working with your pictures immediately and are not trapped "inside" Zoner Photo Studio, it also means that you can delete these files and make irreversible changes to them. Therefore you should always keep in mind the first rule of digital photo processing: always work with copies of files, and back up the original frequently! For the most secure job with your collection of photos, take advantage of these features: backup of the original sync folder Installing Before you install the software program, make sure that your computer meets the minimum system requirements and have administrator rights on computer. 64-bit version of Zoner installation contains both a 32-bit version and a 64-bit version and a 64-bit version of Zoner Photo Studio. It automatically chooses the version to be installed depending on the version of Windows you are using. A shortcut to Zoner Photo Studio is then placed on the desktop and in the Windows Start menu. shows 64-bit version of the x64 program in the title bar 7 8 It's running. 64-bit version - Advantages and limitations The 64-bit version accelerates work with the program and allows you to work with larger images. On the other hand, a program function does not work in 64 bits and therefore are not available. The 64-bit version of Zoner Photo Studio does not contain: integration with Google Earth 64-bit support 8bf module plugin (but this is also not in 32 bit bits Uninstalling the uninstallation program for Zoner Photo Studio, use the Windows control panel and for its use to uninstall a program vary between versions of Windows. Troubleshooting If you run into problems while using Zoner Photo Studio, the first thing to do is to make sure you are using the most recent version of the program. (A build is a "reduced version", in contrast to the "large version" changes that require an update purchase to move between. Each new construction makes the program more reliable, and sometimes adds even improvements.) To check the Presence of a new construction, use help Search for updates ... within the program. If you use the most recent build, then please study the list more frequent to support, where you can find a solution based on the experience of the Zoner Software support team. If you don't do it, then please Zoner Software Contact. Please do your best to provide all useful information to solve the problem. This includes the version of the program, edition, and build, the operating system, the special settings used, etc. Please describe the exact steps that preceded the error or problems in your work with Zoner Photo Studio. To contact technical support easily, use help contact technical support ... This automatically opens a form of technical assistance, which can send a message to the support team automatically. The message can optionally include information about the operating system used, its configuration, and some important files. This information is very important for the Zoner Software support team, as it can help you discover the cause of the problem. Please feel free to write to support with your suggestions on how we could improve and expand the program. Many of the features you see today are thanks to the suggestions from people like you! Technical assistance You can also find support contacts and shapes on the Zoner website: for telephone support, call Monday to Friday 7: 00-12: 30, US Eastern Time. 8 9 Sizes Supported Zoner Photo Studio 18 able to read the following formats: Bitmap Sizes PSD, PSB Adobe Photoshop Image Rows JPEG Interchange Format GIF Compuserve Graphics Interchange Format TIFF Tagged Image File Format PNG Portable Network Graphics PCD Kodak Photo CD BMP Bitmap by Windows PCX Zsoft Image file TGA TrueVision Targa ICO Windows Icons RLE Windows Bitmap WPG WordPerfect Graphics (bitmap) DIB Windows Bitmap BMI Zoner Image Bitmap PSP, PSPImage Paint Shop Pro CRW, negative CR2 Canon Raw DNG (Digital "Adobe Raw") MRW Minolta Raw Nef Nikon Raw Orf Olympus Raw Pef Pentax Raw Arw, SRF, Format SR2 Sony Raw Mef Mamiya Raw Erf Epson Raw Other Raw Thm JPEG Miniature HDP, WDP HD Photo (ex Windows Media Photo) JP2, J2K, JPC JPEG 2000 Codestream PNM, ppm, pam, pbm, pgm "portable bitmap" group format wbmp format "wireless" 3fr hasselblad raw image bms, jps, pns stereo image dcm dicom image camera kdc kodak digital image 9 10 raf fuji Raw FFF Hasselblad Raw Image Rwl Leica RA W Picture MPO Multi-Picture Object CS1 Sinar Raw Image JXR JPEG XR SRW Samsung Raw HDR Image Radiance HDR Image to expand the range of Bitmap formats that is reading supported, install the WIC codecs (for Example The WebP Codec).
