Selegiline tablet

What is this medicine?

SELEGILINE is an monoamine oxidase inhibitor (MAOI). It is used with levodopa-carbidopa in the treatment of Parkinson's disease. It is usually added to therapy when there is a decrease in response to levodopa.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- frequently drink alcohol-containing beverages
- kidney disease
- liver disease
- an unusual or allergic reaction to selegiline, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. Take your doses at regular intervals. Do not take your medicine more often than directed. Do not stop taking except on the advice of your doctor or health care professional.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with
