Calcium Acetate tablet

What is this medicine?

CALCIUM ACETATE is a calcium salt. It works to bind phosphate in the digestive tract. This medicine is used to treat high levels of phosphate in patients with chronic renal failure.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- high level of calcium in the blood
- history of kidney stones
- an unusual or allergic reaction to calcium, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. Take with meals. Take your medicine at regular intervals. Do not take your medicine more often than directed. Do not stop taking except on your doctor's advice.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.

What if I miss a dose?
