Tazarotene Gel

What is tazarotene topical?

Tazarotene topical (for use on skin) is a compound similar to vitamin A. It helps the skin to renew itself more quickly and may improve the appearance and texture of skin.

The Avage brand of tazarotene cream is used to reduce the appearance of fine wrinkles on the face, mottled light and dark skin patches on the face, and benign facial lentigines (non-cancerous freckles) in adults and adolescents who are at least 17 years old.

The Fabior and Tazorac brands of tazarotene topical are used to treat acne vulgaris in adults and adolescents who are at least 12 years old. Tazorac is also used to treat plaque psoriasis (raised, silvery flaking of the skin) in adults.

Tazarotene topical may also be used for purposes not listed in this medication guide.

Important Information

tazarotene topical can cause birth defects. Do not use if you are pregnant. Use effective birth control to prevent pregnancy. Stop using tazarotene topical and tell your doctor right away if you
