Celecoxib capsule

What is this medicine?

CELECOXIB is known as a COX-2 inhibitor, a drug that belongs to the non-steroidal anti-inflammatory drug (NSAID) class. It is used to reduce swelling and to treat pain. This medicine is commonly used for various types of joint and muscular conditions, such as arthritis. It may be also used for bone pain, dental pain, headaches, or painful monthly periods. It may also be used to reduce the number of colon or rectal polyps in certain people.

What should I tell my health care provider before I take this medicine?
